TOGETHER, WE RISE

WITH **EXCELLENCE.** WITH **PURPOSE.**

Reading Instruction & Dyslexia

Learning Targets and Success Criteria

Learning Target 1:

I am learning how PPS supports ALL students with HQIM aligned to the science of reading, as well as aligned core supports for students showing dyslexia risk.

Success Criteria 1:

I can describe how PPS's high quality instructional materials and core supports align to best practices for dyslexia and early literacy instruction.

Learning Target 2:

I am learning how PPS meets Oregon Department of Education's requirement to screen students for risk factors of dyslexia and train teachers in dyslexia.

Success Criteria 2:

I can explain how PPS exceeds the Oregon Department of Education's requirement for dyslexia screening and teacher training.

District Continuous Improvement Plan: Goals

ATTENDANCE

By June 2028, the overall percentage of students with good or acceptable attendance rates will increase by 15%, from 67% to 82%.

In order to reduce the disproportionate gap, the percentage of students with good or acceptable attendance for all focal groups (Black & Native students, multilingual learners, students receiving special education services, and students experiencing poverty) will increase by 24%.

LITERACY

By June 2028, and in addition to the targeted focus on Literacy and Math Continuous Improvement at the site level in 2025–26, all students in all PK-12+ classrooms will: Know and understand the learning target and success criteria, successfully engage in grade-level and standards-aligned tasks from district-approved, high-quality instructional materials and structures, self-assess their learning and explain and justify their thinking connected to the learning target and success criteria. This will have a particular focus on our district's focal students.

By June 2028, all students in 100% of PK-12+ Language Arts classrooms–with a particular focus on our district's most impacted focal students based upon our data (Native students, Black students, multilingual learners, students receiving special education services, and students experiencing poverty) - will (1) know and understand the learning target and success criteria and (2) successfully engage in grade-level and standards-aligned tasks from district-approved high-quality instructional materials and structures.

MATH

By June 2028, all students in 100% of PK-12+ Mathematics classrooms–with a particular focus on district focal students (Native students, Black students, multilingual learners, students receiving special education services, and students experiencing poverty)--will (1) know and understand the learning target and success criteria and (2) successfully engage in grade-level and standards-aligned tasks from district approved high-quality instructional materials and structures.

9TH GRADE SUCCESS

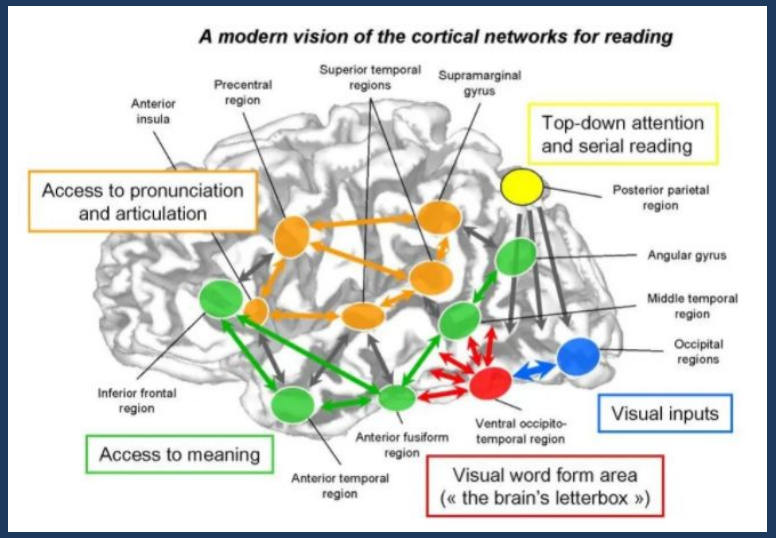

We will accelerate achievement and eliminate early high school opportunity gaps by ensuring all students finish 9th grade On Track. Our goal is to increase the percentage of all students finishing 9th grade On Track from 75% (June 2024) to 95% by June 2028, while closing the opportunity and outcome gap for focal students by increasing their On-Track rate from 53% to 95% over the same time period.

All Readers Need the Same Instruction!

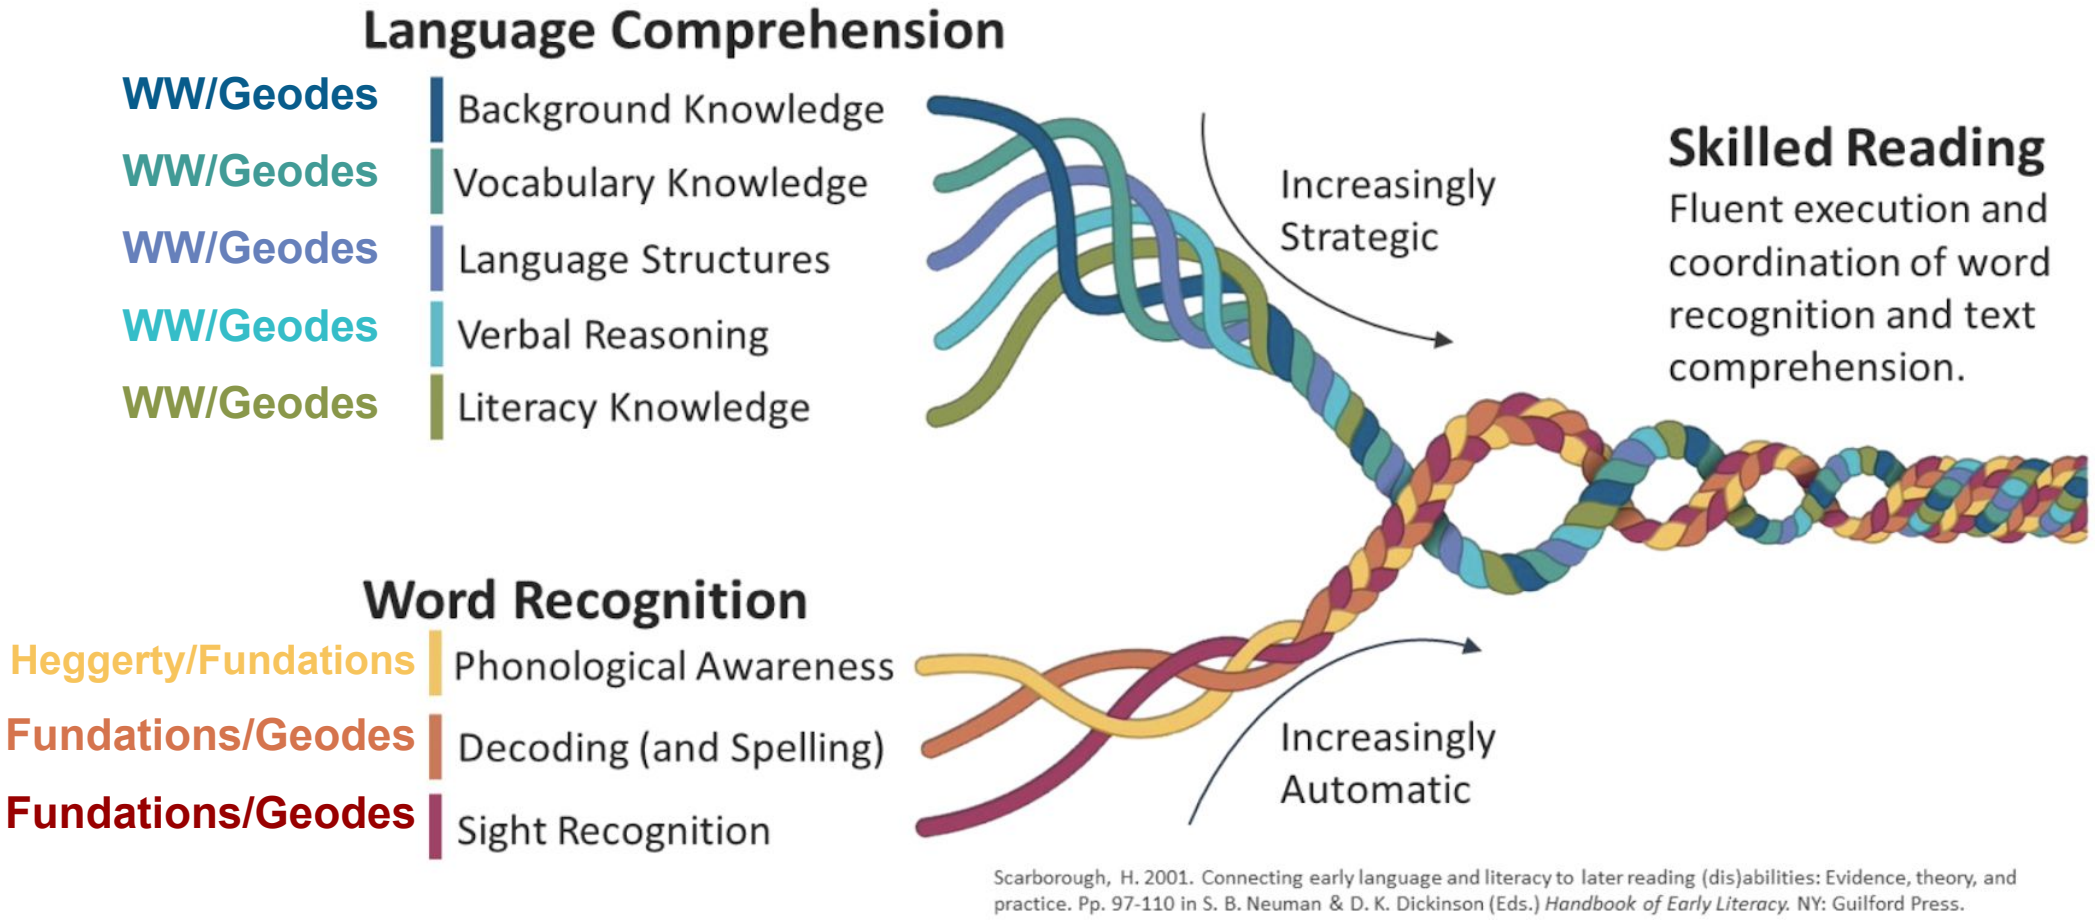

Evidence and research-based reading instruction, otherwise known as the Science of Reading

Decades of neurological research across languages, cultures, and writing systems has repeatedly reaffirmed that all humans develop literacy in the same manner and using the same neural pathways.

Students who have risk factors for dyslexia need the same explicit phonics and phonemic awareness instruction as everyone else. **The only difference is that they may need additional, multisensory opportunities for repetition and practice and a narrowed instructional focus.**

Scarborough's Reading Rope & PPS Curriculum Alignment

Scarborough, H. 2001. Connecting early language and literacy to later reading (dis)abilities: Evidence, theory, and practice. Pp. 97-110 in S. B. Neuman & D. K. Dickinson (Eds.) *Handbook of Early Literacy.* NY: Guilford Press.

Oregon Dyslexia Requirements

ORS 581-022-2445 Universal Screenings for Risk Factors of Dyslexia
Each school district shall ensure that every student is screened for risk factors of dyslexia using a screening test identified by the department when the student is in: *(a) Kindergarten, if the student first enrolls at a public school in this state for kindergarten; or* *(b) First grade, if the student first enrolls in a public school in this state for first grade.*

PPS Dyslexia Screening Practices

All Kindergarteners

Dyslexia Screener:

Includes measures assessing foundational skills, rapid automatic naming (RAN), and nonsense word fluency.

New 1st Graders

Dyslexia Screener:

Includes measures assessing foundational skills, rapid automatic naming (RAN), and nonsense word fluency.

All 1st Graders

Adaptive Oral Reading:

Includes measures assessing sentence reading fluency, foundational skills, oral reading fluency with comprehension.

All 2nd Graders

Adaptive Oral Reading:

Includes measures assessing sentence reading fluency, foundational skills, oral reading fluency with comprehension.

Important: A flag on these assessments is not a diagnosis of dyslexia or of a reading disability; rather, it is an indicator that the student's performance suggests possible risk factors for dyslexia or other reading difficulty.

When a student is flagged, what happens next?

Kindergarten + 1st Grade + 2nd Grade

1st Grade + 2nd Grade

Tier II
Small group, reteach

Classroom teacher utilizes assessment data to form small groups of students that need lessons retaught

Tier II
High Impact Tutoring

Tutor utilizes assessment data to instruct 1-3 students in grade-level skills

Tier III
Intensive Intervention

Licensed interventionist utilizes assessment data to instruct no more than 5 students on previous grade skills

Tier III
Data & Supports Monitoring

The building Student Intervention Team (SIT) monitors Tier III intensive data in Synergy to determine additional supports and/or eligibilities

Literacy Screening Practices in Grades Grades 3-8

All students in grades 3-8 participate in MAP Growth - Reading testing in the Fall and Winter to measure their progress in reading over time.

Literacy Diagnostics

Any 3rd-8th grade student falling below the 20th percentile on MAP Growth - Reading is identified to have additional literacy diagnostics administered in oral reading fluency and spelling to confirm a need for an intervention during WIN Block (grades 3-5) or during a stand-alone intervention course (grades 6-8).

Tier III Monitoring

Any 3rd-8th grade student receiving intensive intervention during WIN block (3-5) or enrolled in an intervention course (6-8) is regularly monitored with curriculum-embedded assessments and an oral reading fluency measure.

Oregon Dyslexia Requirements

ORS 581-022-2440 Teacher Training Related to Dyslexia
Each school district shall ensure that at least one kindergarten through grade five teacher in each kindergarten through grade five school has received training related to dyslexia.

Teacher Training Related to Dyslexia

Over 350 educators across PPS have completed an ODE-approved dyslexia training.

This training covers:

- Understanding and recognizing Dyslexia
- Using evidence-based practices to systematically and explicitly teach the foundational skills in reading; and
- Intensifying instruction to meet the needs of students with severe reading difficulties, including dyslexia

Our PPS HQIM adoptions, Science of Reading training investments, and curriculum-embedded trainings also align to these areas.
