Required Instructional Minutes Staff Report 2024-25

Learning Target	Success Criteria
By the end of this session, participants will be able to **analyze the state's comprehensive framework for instructional time**, including minimum requirements, compliance benchmarks, and the official provisions for time exemptions.	Participants will be able to demonstrate a thorough understanding of the regulations by: • **Identifying** the specific minimum annual instructional hours required for each designated grade band (e.g., K-8, 9-11, 12). • **Explaining** the purpose and application of the "80% rule" as the school-level compliance threshold for instructional time. • **Learning about** the specific conditions and official provisions that constitute state-approved exemptions to the standard instructional minute requirement. **Note:** We are not making a recommendation for additional state-approved exemptions.

Required Instructional Minutes Staff Report 2024-25

There are essentially two key components to calculating the Required Instructional Time with the additional consideration of state-provided exemptions.

1. Each school district shall ensure that at least 92% of all students in the district and at least 80% of all students (who are not exempted from the calculation) at each school operated by the district **are scheduled to receive annually the following hours of instructional time**. This part of the rule primarily applies to the scheduling of high school students.
   (A) Grade 12 — 966 hours;
   (B) Grades 9–11 — 990 hours; and
   (C) Grades K–8 — 900 hours.
2. Review of **actual instructional time** achieved during the school year **per grade level**.
3. Review of and determination of state-provided exemptions.
