What Does a Successful Boundary System Look Like?

District-wide Boundary Review Advisory Committee

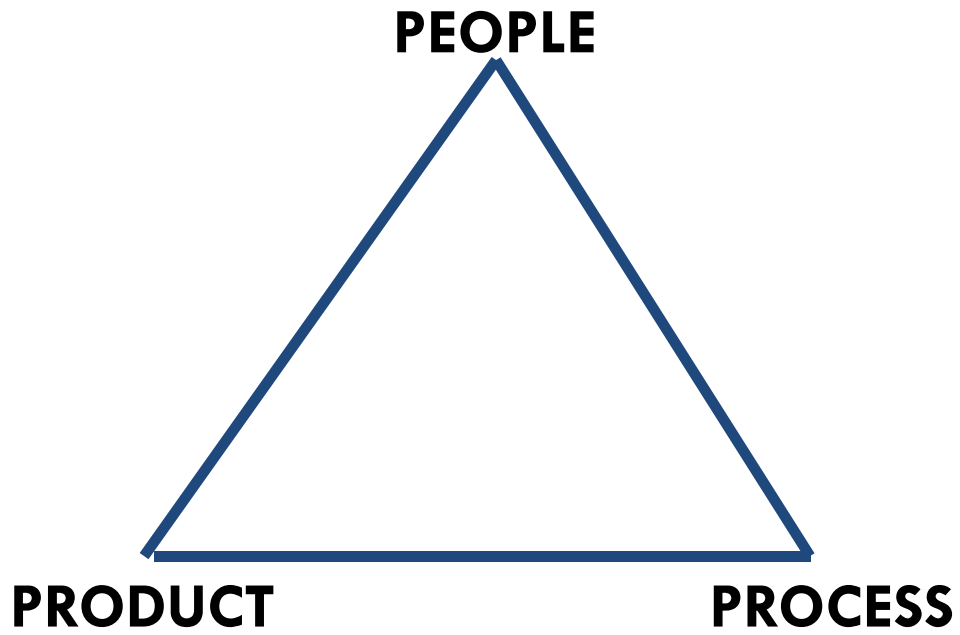

January 8, 2015

Key Questions

- How will you know when you get it right—or wrong?
- What needs to be understood and measured as part of boundary review?
- How closely aligned is D-BRAC's version of success with that of the superintendent, school board and the broader community?

We will work together to answer these questions over the coming months

System components

We will look at all three components, but focus tonight on **PRODUCT**

Purpose of boundary review

- Establish strong, appropriately sized programs through an equitable, inclusive, transparent and on-going enrollment balancing process
- Equitably manage future enrollment growth
- Respond to community values and views on program offerings, enrollment & school configurations

School boundary characteristics

- Factors for consideration in policy and administrative directive
- Non-prioritized, non-exclusive

Factors for consideration

- Stable feeder patterns
  - Most students move together to the next school
  - Elementary schools feed 1-2 middle schools, middle schools and K-8s feed 1-2 high schools
- Demographic diversity
  - Schools reflect the broader diversity in the district
  - Schools have space to accommodate students with different learning needs

Factors for consideration

- Compact assignment areas
  - Safe routes to school
  - A sense of community
  - Minimal transportation times
- Optimal use of existing facilities
  - Minimize facility changes
  - Conservation of natural resources
  - Student enrollment supports an adequate academic program

Factors for consideration

- Stable program and enrollment in surrounding schools
  - Avoid frequent changes
  - Minimize instability at nearby schools and programs
- Limit student impact
  - Affect smallest number of students possible
  - Avoid moving students more than once at a school level
  - Avoid separating small numbers of students at the next school level

Turn and talk

- What is missing from the purpose statements and list of factors?
- Which of the factors for consideration is least important to you, and why?

Next steps

- Make sure we have learning opportunities in place for all successful boundary factors
- Develop success statements to capture the qualities that you believe are most important to achieve through boundary change
- Refine statements based on results of Values, Growth and Equity survey
- Seek endorsement from Superintendent and School Board
