ENROLLMENT/PROGRAM ISSUE WORKSHEET

School: Skyline **Principal: Jill Sage** **Senior Director: Lisa McCall**
Form completed by: Judy Brennan **Draft Date:** 11/14/2014

PART ONE: Current configuration

Students by grade		Instructional Spaces		Teachers		Comparisons	
K	38	**Classrooms (full access)**	15	**Classroom Teachers**	12.40	**Utilization (c)**	100%
1	37	**Classrooms (grade limited)**		**Electives**	1.50	**Utilization rank (d)**	9 of 15
2	33	**Total Classrooms**	15	**Special Ed**	1.00	**Enroll change '13 to '14**	47
3	36			**ESL (.5 wt for utilization)**	0.25	**Student: teacher ratio**	20.6
4	25	**Instr support rooms(a)**	4	**Total**	15.025	**Ratio rank(e)**	7 of 15
5	43	**2013 Demographics**				**Est 15-16 utilization(f)**	107%
6	41	Students of color	20%	**Instructional support (b)**	1		
7	27	Students who qualify for F/RM	30%				
8	29	Students who qualify for ESL	>1%				
Total	309	Students who qualify for SPED	15%				

Sources: preliminary 2014 enrollment, staffing and classroom counts; demographic data from 2013 enrollment profiles

(a) Instructional support rooms are spaces that do not qualify as classrooms but can be used for small group student support and instruction.

(b) Instructional support staff includes counselors, instructional specialists and coaches, student management specialists and other staff who may meet with small groups of students to provide support and instruction

(c) Utilization is the number of teachers who would normally be assigned a full classroom (ESL 1/2 wt, no PE) compared to the number of classrooms on a campus

(d) Utilization rank among 15 schools monitored for overcrowding. The average utilization in this group is 101.4%

(e) Student: teacher ratio rank among 15 schools monitored for overcrowding. The average ratio in this group is 20.4

(f) 2015-16 utilization assumes same K enrollment next year as this year, and that current class sizes below 25 at grades 1-5 could be compressed to fewer sections (does not assume creating additional multi-grade blended classrooms)

ENROLLMENT/PROGRAM ISSUE WORKSHEET

School: Skyline **Principal: Jill Sage** **Senior Director: Lisa McCall**

PART TWO: Issue summary

Skyline is a very small school serving a semi-rural portion of the district. Because of the small size of the school, even minor enrollment changes can have program impacts for all students. Skyline saw an unexpectedly large influx of new neighborhood families this year. Due to urban growth boundary rules, PPS has few options for expanding classroom space at Skyline. The school has been open to transfers in the past, and could limit those in the future. However, transfer limits will not be enough to offset space needs for next year.

Cause of the enrollment change Neighborhood enrollment growth
Is this issue new this year? [✓ YES] NO
Potential implications if no change next year Larger class sizes, possible reduction of programming

PART THREE: Options to address issue

Change type	Cost	Timeline for decision	Decision-making process	Related impacts	Benefits	Risks	Feasibility rank
Close school to transfers	n/a	Winter 2014-15	Principal/OSP		Provides minimal enrollment relief	Does not fully address issue	#1
Interior changes	yes--$$ tbd	Winter 2014-15	Facilities/OSP		Free up 1 class	Building limitations, maybe cost prohibitive	#2
Boundary change	n/a	District-wide boundary review, implement in 2016 or later			Reduced population	Loss of program; greater distance for some families	#3
Grade reconfigur-ation	Likely	District-wide boundary review, implement in 2016 or later			Reduced population	Significant program/staff changes	#4
