PORTLAND PUBLIC SCHOOLS

BOARD OF EDUCATION

REGULAR MEETING

FEBRUARY 14, 2005

AGENDA

Celebrate! Portland Public Schools
January 18, 2005

Portland Public Schools Strategic Plan
June 26, 2000

Mission

The mission of Portland Public Schools is to support all students in achieving their very highest educational and personal potential, to inspire in them an enduring love for learning, and to prepare them to contribute as citizens of a diverse, multicultural, and international community.

Core Values

We believe that:

- Every human being has intrinsic value.
- Creating trusting relationships, working together and building on the strengths of our diversity are essential for a strong community.
- Everyone has the ability to learn.
- When individuals have equitable and just access to opportunities and have satisfied basic needs, they can realize their full potential and contribute to the community.
- Involving stakeholders in decision-making leads to better outcomes.
- Adult behavior is a powerful teacher for young people.
- Assuming individual and collective responsibility for the choices we make is critical to creating the future we desire.

Objectives

By 2005:

- 100% of our students will demonstrate significant growth every year toward achieving rigorous system-wide academic expectations.
- 100% of our students will continually set ambitious learning goals, persist in pursuing those goals, and demonstrate evidence of progress.
- 100% of our students will willingly and regularly contribute to the community.

Strategies

- We will create a system-wide **culture** that reflects an ethic of service, excellence and respect.
- We will create **partnerships** with stakeholders to achieve our strategic objectives and mission. (Stakeholders include: parents, students, all staff, business, community based organizations, local and state government and the voting public.)
- We will actively select, support and retain **employees** who contribute to accomplishing the mission and strategic objectives, and who reflect the diversity of our students.
- We will eliminate the **achievement disparity** of low income children, children of color, and English Language Learners in relation to District Standards.
- We will, in partnership with stakeholders, monitor, propose, influence, and negotiate **legislation** and **regulations** to support implementation of strategic objectives.
- We will provide the means and **flexibility** necessary for each school and department to develop and implement a plan that meets the strategic objectives and holds each accountable for its contribution in meeting those objectives.
- We will adopt system-wide **standards** for the students' achievement of the strategic objectives and the means to assess them at each school.

Delimiters

We will not initiate any new program or service unless:

- It is consistent with and contributes to our mission, and
- It is accompanied by a plan to assess its effectiveness relative to achieving our strategic objectives and mission.

We will not enter into any new agreement unless it is consistent with and contributes to our mission.

BOARD OF EDUCATION
Portland Public Schools
Regular Meeting
February 14, 2005

Auditorium
Blanchard Education Service Center
501 North Dixon Street
Portland, Oregon 97227

Note: *Those wishing to speak before the School Board should sign the citizen comment sheet prior to the start of the regular meeting. No additional speakers will be accepted after the sign-in sheet is removed, but citizens are welcome to sign up for the next meeting. While the School Board wants to hear from the public, comments must be limited to three minutes. All citizens must abide by the Board's Rules of Conduct for Board meetings.*

Citizen comment related to an agenda item will be heard immediately following staff presentation on that issue. Citizen comment on all other matters will be heard during the "Remaining Citizen Comment" time.

At the second Board meeting of the month, the Board will only hear citizen comment relating to specific agenda items. Citizen comment not relating to a specific agenda item will only be heard at those meetings in which there is time allocated for "Remaining Citizen Comment."

This meeting may be taped and televised by the media.

AGENDA

1. **ANNOUNCEMENTS/CELEBRATIONS** 6:30 PM

- 2005 Down Syndrome Awareness Calendar – sponsored by North West Down Syndrome Association
- Career and Technical Education Week: February 13-19
- Thank you to those who contributed to the success of Celebrate! Portland Public Schools event
- A special thank you to Daryl Webb, CEO of Fred Meyer, for donating conference space for Leadership Academy meetings each month
- Purchase pledges from Powell's Books and help place 50,000 new books on Portland area school library shelves
- School Funding Rally in Salem – Monday, February 21st
- Portland Schools Foundation Roast – Thursday, February 24

- Replay of the February 14, 2005 meeting may be viewed on Cable Channel 28 on:

Wednesday, February 16, 2005	9:30 PM
Friday, February 18, 2005	10:00 AM and 8:30 PM
Saturday, February 19, 2005	7:30 PM
Sunday, February 20, 2005	4:00 PM
Monday, February 21, 2005	8:00 AM

2. **ACADEMIC ACCOUNTABILITY** 6:45 PM

- Superintendent's Proposals Following Enrollment Data Analysis -- *Information Item*
- Superintendent's Proposal for New Graduation Requirements (Class of 2009) – *Information Item*
- Enrollment and Transfers Policy Review and Implementation – *Information Item*

3. **FINANCIAL ACCOUNTABILITY** 8:15 PM

- Local Option Levy and Capital Bond Renewal – *Information Item*
- Feasibility Study on Disposition of Blanchard Education Service Center – *Information Item*

4. **LEGISLATIVE REPORT** 9:15 PM

(Information Item)

5. **STUDENT REPRESENTATIVE'S REPORT** 9:20 PM

(Information Item)

6. **BUSINESS AGENDA** 9:25 PM

(Action Item)

7. **OTHER BUSINESS** 9:30 PM

8. **REMAINING CITIZEN COMMENT** 9:35 PM

9. **ADJOURN** 9:45 PM

The Chairperson will announce that the next regular meeting of the Board will be held on Monday, February 28, 2005 at 6:30 PM in the Board Auditorium of the Blanchard Education Service Center, 501 North Dixon Street, Portland, Oregon.

Superintendent's Proposals Following Enrollment Data Analysis

OFFICE OF THE SUPERINTENDENT

Vicki L. Phillips
Superintendent

MEMORANDUM

Date: February 11, 2005

To: Portland School Board

From: Vicki Phillips

Re: Proposals from the Enrollment Data Review

Accompanying this memorandum are the proposals resulting from our Enrollment Data Analysis. These are proposals for consideration by the Board and the community with recommendations to follow on February 28th. These proposals follow an intensive process that included the development of school profiles on all elementary schools and extensive discussions with schools and area directors about questions presented by the data. This process has been discussed previously at Board meetings, and a copy of our framework for decision-making and the profiles were included in your January 24 Board book.

Three of our proposals for the 2005-06 school year involve major changes in schools. One proposal involves an entire cluster with implementation occurring during 2005-06 and 2006-07. Two other proposals address smaller boundary issues. While some parts of the proposals require further development before their formal recommendation on February 28, I believe the thought and substance of the proposals are sufficient to allow for neighborhood-based hearings and broader community discussions.

You will be asked to approve our final recommendations in mid-March.

I want you to know how proud I am of the central staff and school administrators who stepped courageously into the discussions and who worked tirelessly to meet our test of data-based decision-making.

Portland Public Schools
Enrollment Data Analysis: Framework for Decision-making
Proposal For Board and Community Consideration
February 11, 2005

Section 1: School Information

School: Smith Elementary School
8935 SW 52nd
Portland, OR 97219

Cluster: Wilson Cluster
Feeder Pattern: Jackson Middle School

Section 2: Nature of Proposal (Select appropriate boxes.)

- [X] Boundary Alignments
- [ ] Program Initiation, Expansion or Closure
- [X] School Initiation or Closure
- [ ] Restructuring the delivery of effective instruction, e.g. full-day kindergarten, alternative configurations, such as K-8, K-6, 7-12)

Section 3: Description of Proposal

Close Smith Elementary School and realign neighboring school boundaries to include Smith neighborhood students. Redesign instructional programs at Markham, Maplewood, and Capitol Hill to meet the needs of students blending from neighborhoods in Southwest Portland.

Section 4: Rationale based on data and research supporting change.

Background information:

Wilson Cluster has seven elementary schools, two middle schools and one high school. The elementary enrollment of cluster schools ranges from 353 students (Hayhurst) to 219 students (Smith). With the exception of Hayhurst School, all cluster elementary schools have experienced declining enrollment for the past five years. The Odyssey Program, a Focus Option, moved from Chapman School to Hayhurst last year, and increased the enrollments by 112 students (From 212 to 353 students in grades K – 8). Four of the other cluster elementary schools have enrollment under 300 students in grades kindergarten through fifth grade.

Historically, Wilson Cluster has opened and closed elementary schools as the population has changed and the need for elementary schools increased or decreased. In the early 1980's, Rieke was closed due to low enrollment. Markham was reopened as a K-5 program to relieve over-crowding at Stephenson and Smith in 1989. Rieke was reopened in the early 1990's due to an increase of families in the Hayhurst and Capitol Hill neighborhoods.

In 2003, the District convened a Westside Boundary Task Force to review options for boundary changes and school mergers. They received input from school staff, parents and community who indicated that they supported small, high performing schools in the Cluster.

The goal:

The District's goal is to build high-quality accessible schools in all neighborhoods with focus options available to families with interests that can best be met with a theme-based program. The Wilson Cluster Schools' goal is to implement an arts focus throughout the cluster in grades kindergarten through 12. In order to meet these goals, the schools need to have adequate staff and support. The realignment of boundaries from seven to six neighborhoods will increase school enrollment and redistribute available support to programs based on current staffing formulas and student-based allocations, e.g. Special Ed., ELL, TAG.

The following factors were considered in the recommendation to close Smith School:

1. Academic Achievement:

   All Wilson Cluster schools are high performing. Smith received an Exceptional rating this year.

2. Neighborhood:

   All Wilson Cluster elementary schools have a high capture rate of neighborhood students. The range is from 91% for Stephenson School to 67% for Hayhurst. Smith's capture rate is 73%. Out of the 79 students living in the Smith neighborhood attending other Portland Public Schools, 54% are attending a focus option including 17 who transferred to Hayhurst for the Odyssey program for the 2004-05 school year. Thirty-nine percent attend other Cluster elementary schools including 8 at Capitol Hill, 4 at Maplewood and 10 at Markham.

3. Enrollment:

   Wilson Cluster elementary schools enrollment ranges between 353 and 219 students. Smith School has 219 students enrolled this year. They are one of nine elementary schools in the District with an enrollment under 249 students. This is a decline of 19 students from the 2003-04 school year. The school's grade level enrollment is from

33 in kindergarten to 42 in fifth grade. Smith has three grade levels with enrollment under thirty-five students.

4. Facilities/Density:

In general, Wilson Cluster elementary schools were constructed to house K-5 programs and do not have additional room to accommodate focus option programs that attract students district-wide and increase enrollment in schools. The exception is Hayhurst School that was originally a K-8 school and is a large building with twenty-two classrooms. Due to low neighborhood enrollment, Hayhurst had capacity this year to house the Odyssey Program as a program-of-the-school with shared resources.

Smith's facility and physical location is not conducive to bringing in other options. Smith School has 16 classrooms. Nine are used for classroom instruction, one each kindergarten, music, art, ESL/Learning Center, computer lab, and small group instruction. There is insufficient space to add a focus option similar to Odyssey that could increase their enrollment.

5. Budget/Staffing:

Wilson Cluster has four schools with enrollment under 300 (Capitol Hill, Maplewood, Rieke, Smith). Schools receive funding for staff and materials based on Average Daily Membership (ADM) for the past two semesters. Two current General Fund staffing allocations are student to teacher ratio (30:1) or Earned FTE, and Standard Support Tables. These four schools are averaging 7 FTE (Full Time Equivalent employee) from the ratio and 3.5 FTE from Standard Support Tables. The schools also receive FTE for Kindergarten, Local Option Levy Measure (Expires at the end of 2004/05 school year), Special Education, ESL, and other support such as Foundation Grants. Small schools find it challenging to fund staffing positions for Child Development Specialists, PE, Music and Art Instructors because they use their staffing allocations to balance out classrooms among the grade levels.

Smith School has 6.97 FTE (30:1 ratio) and 3.0 FTE Standard Support. They currently have nine classroom teachers for grades 1 through 5 and one ½ day kindergarten classroom instructor and one full day fee based kindergarten. Their current funding also supports a principal, secretary, part-time PE and Music instruction. They have no Child Development Specialist.

Realigning the neighborhoods would increase the number of staff assigned to a school in both Earned FTE (student to teacher ratio) and Standard Support (Standard Support would increase by 1.0 FTE *only* if their enrollment increased to over 300 students). Increase in ADM gives principals more flexibility in staffing classrooms and offering additional staff for Music, PE, Art, Music and counseling.

Section 5: Educational Impact

1. **How will the proposal impact student achievement?**

   All Wilson Cluster Schools are academically successful. The Cluster Elementary Schools have a long history of working together to implement similar curriculum and teaching strategies to facilitate smooth articulation to Cluster middle schools and high school.

   With the additional resources resulting from the increase in student population in the receiving schools, principals and staff will have a higher concentration of resources (including District and community) to provide enrichment classes during and after school. The Arts focus will be strengthened at Markham and Capitol Hill by an increase in enrollment and staffing. The staffing increase will come from additional ADM and/or standard support. This should allow them to keep the arts staff in spite of other possible cuts (Local Option Sunset).

2. **How will the proposal meet the needs of low achieving, special needs, ELL, and TAG students?**

   Currently eight percent of Smith Students are receiving ELL services. By realigning the boundaries, the percentage of ELL students will increase at neighboring schools and the amount of time an itinerant teacher spends at the school delivering services will increase proportionally. The same will be true for Special Education and TAG students. Increased numbers of ELL students would mean at least half time services in place of itinerant. Additional FTE for increased numbers of Special Education students would also occur.

3. **Based on projected enrollment, how does the proposal meet the needs of the students in that school community?**

   The data shows a continued trend of enrollment decline in most of the Cluster Schools. Lower enrollment will mean less staffing which will increase the pressure to eliminate all supports (music, extended day, art, etc.) beyond the basic classroom. For the Cluster to support an effective and efficient Arts strand, we need to concentrate resources in fewer schools with higher enrollment and the capacity to offer support beyond the basic classroom.

Section 6: Cluster Analysis

1. **How will the proposed change affect equity of access to schools offering high quality educational choices?**

   Equity of access to extended day and community supports will be enhanced with a larger concentration of efforts at fewer schools. Students who are struggling will get additional support. Smith students will continue to have opportunities in the Arts, PE,

and counseling despite looming cuts based on budget loses to the district in the 2005-2006 school year. Smith students will have enhanced opportunities for extended day services as Markham and Capitol Hill have a plethora of such programs.

The majority of elementary students in Wilson Cluster are transported to their schools by bus or personal car due to neighborhood boundaries consisting of both sides of I-5, Barbur Blvd., Beaverton-Hillsdale Highway, Capitol Hwy, Taylors Ferry, Macadam Blvd, all of which create unsafe or hazardous walking conditions. Students will continue to receive transportation to and from school with a minimal amount of additional time on a bus.

2. **How will the proposed change affect other schools within the cluster, both in the quality of their educational programs and in the number of students attending them including feeder patterns.**

The educational programs will be enhanced by having additional FTE to staff positions beyond the classroom. The boundaries should be redrawn to send the bulk of the students to Markham and Capitol Hill since Maplewood is close to capacity.

Students attending Capitol Hill will have access to 2 full day kindergartens at Markham. Additional students may allow enhanced full day kindergarten opportunities.

The articulation pattern to Jackson Middle School will continue to remain the same for students who will be attending Markham or Capitol Hill. Students who become part of the Maplewood neighborhood will have their pattern changed from Jackson to Gray. Gray and Jackson offer similar programs including music, arts, and PE. All current Smith 5th graders would be able to articulate to Jackson. New articulation patterns would go into effect for the 2006-07 school year, with continued option to apply for transfers when appropriate or desired.

3. **How will the proposed change affect schools outside the cluster both in quality of their education programs and the number of students attending them?**

There should be no impact outside the cluster.

Section 7: Implementation Strategy

1. **Action Steps/Timeline**

The steps outlined in the initiation and closure policy will be followed. The committee work that outlines an implementation plan will be a guide.

1. Decision regarding boundary realignment.

2. Staffing reassignments/scheduling/room assignments.
3. Professional development for new staff/new program/new group of students.
4. Reallocation of ELL, SpEd, TAG resources due to relocation of students.
5. Relocation of programs on site not part of school.
6. Redesign of new transportation routes/opening/ending times might have to change.
7. Closure of school and redistribution of materials, library, AV, furniture, cafeteria, student body funds.
8. Creation of new neighborhood PTA, LSACs/after school programs/partners.
9. Welcoming activities for new neighborhood attendance area for beginning of school.

2. What kind of assistance is needed? (e.g. facilities, nutrition services, transportation, staffing, materials/curriculum)

The implementation support plan recommendations will serve as a guide.

1. Transportation
2. Nutrition Services will have to adjust to meet increase in service

Portland Public Schools
Enrollment Data Analysis: Framework for Decision-making
Proposal For Board and Community Consideration
February 11, 2005

Section 1: School Information

School:

Edwards Elementary School
1715 SE 32nd Place
Portland, OR 97214

Abernethy Elementary School
2421 SE Orange Street
Portland Oregon 97214

Cluster: Cleveland/Franklin

Section 2: Nature of Proposal (Select appropriate boxes.)

- [ ] Boundary Alignments
- [ ] Program Initiation, **Expansion** or Closure **(Year Round School)**
- [x] School Initiation or Closure/ **Merger**
- [ ] Restructuring the delivery of effective instruction, e.g. full-day kindergarten, alternative configurations, such as K-8, K-6, 7-12).

Section 3: Description of Proposal

The proposal is to merge Edwards and Abernethy Elementary School into a single year-round school. The merger would occur at the end of the 2004-05 school year. The program would be located at the Abernethy site and the Edwards building closed. This will provide continuity to the year-round program and stability for two small schools.

The Edwards neighborhood boundary would need to be redrawn so that all Edwards neighborhood students would be included in the Abernethy boundary. The new Abernethy proposed boundary would extend east on Hawthorne to 39th, South on 39th to Division, west on Division to 34th, south on 34th to Woodward and west on Woodward.

The new feeder pattern would be Abernethy/ Hosford/Cleveland.

Section 4: Rationale based on data and research supporting change.

Background:
Edwards is a small year-round school that splits between the Franklin and Cleveland clusters. There are 199 students enrolled at Edwards which only has 9 classrooms. There are 10 more students this year than last year and their density index is 22. Edwards was reviewed because of their capture rate. There are only 60 students living in the Edwards neighborhood and 28 of those students attend a different PPS school.

Abernethy is currently a small traditional elementary school that feeds Hosford Middle School and Cleveland High School. There are 203 students enrolled, but the building has 21 classrooms, a density index of 10. The school has had stable enrollment and captures 67% of its neighborhood students. The neighborhood population is 218 students; 145 of those students attend Abernethy.

Schools with less than 250 students are limited in their curricular offerings based on staffing. Edwards has the least number of FTE for any school in the district at 9.56. Since the initial recommendation for closure, Edwards has been in a position of instability. It is unclear whether this or other reasons are responsible for the school's low capture rate. Of the 60 students living in the Edwards neighborhood, 32 attend Edwards and 28 Edwards students have transferred to the following schools:

7 to Richmond
1 to Sunnyside
6 to Atkinson
3 to Buckman
2 to Woodstock
1 to Garden Laboratory Charter School
3 to Winterhaven
2 to Laurelhurst
1 to Duniway
1 to Bridger
1 to Grout

Section 5: Educational Impact

1. **How will the proposal impact student achievement?**

   Student achievement should increase because neighborhood students will be in an educational setting with more variety in curriculum. Abernethy would provide neighborhood students with both a full day Kindergarten and half day Kindergarten option. Both schools are strong supporters of the arts and music. Both are solid schools and rank well on the state report card - Edwards has an exceptional rating; Abernethy a strong rating.

2. **How will the proposal meet the needs of low achieving, special needs, ELL, and TAG students?**

   Edwards has 12.2% of its students on Free and Reduced Lunch. Abernethy has 31.7%. Edwards and Abernethy both have less than 5% ESL students. Edwards has 20% TAG students and Abernethy has 27%. The amount of time teachers spend at the school delivering services will be adjusted to ensure that student needs are being met.

3. **Based on projected enrollment, how does the proposal meet the needs of the students in that school community?**

   Abernethy is expected to have an enrollment decline over the next five years. Through this realignment, fewer schools with more students will mean that supports beyond the basic classroom will be available for the Edwards students. Additionally, Abernethy will convert to a year-round school thus still meeting the needs of the year-round families. This will provide stability for both schools and their neighborhoods.

   Under the PAT contract, teachers generally follow the students when schools are merged. This will enable the new school to capture the expertise of the teachers in operating a year-round program.

Section 6: Cluster Analysis

1. **How will the proposed change affect equity of access to schools offering high quality educational choices?**

   Edwards and Abernethy both use Art for Life to provide before and after school care.
   Edwards and Abernethy both have active gardens associated with the schools.
   Abernethy has a full day and half day Kindergarten option.
   Abernethy has a computer lab, library, cafeteria, gym, art/science lab, new playground and covered play area.
   Edwards has a basic skills teacher, a character education grant that brings a ½ time counselor and professional development for the next two years, and offers before school Spanish.

2. **How will the proposed change affect other schools within the cluster, both in the quality of their educational programs and in the number of students attending them including feeder patterns.**

Abernethy would become a year round school, which would be a change for the Abernethy neighborhood families.

By creating larger enrollment and surrounding neighborhood schools, the proposal would bring stability of curriculum to the cluster.

If all Edwards students went to Abernethy, Mt. Tabor and Franklin would lose approximately 30 additional students in their feeder pattern.

3. **How will the proposed change affect schools outside the cluster both in quality of their education programs and the number of students attending them?**

   By moving the year-round curriculum to Abernethy, a larger school, there would be more spaces available for the transfer of interested students outside of the cluster.

Section 7: Implementation Strategy

1. **Action Steps/Timeline:**
   a. Communication to families regarding placement/articulation patterns
   b. Staffing reassignments/scheduling/room assignments
   c. Professional Development for new staff/new program/new group of students
   d. Reallocation of ELL, Special Ed, TAG due to relocation of students
   e. Examination of current programs located at receiving schools
   f. Creation of new neighborhood PTAs, LSACs/afterschool programs/partners
   g. Welcoming activities for new neighborhood attendance area for beginning of school
   h. Redesign of new transportation routes/opening/ending times may have to change

2. **What kind of assistance is needed? (e.g. facilities, nutrition services, transportation, staffing, materials/curriculum)**

   Transportation would need to assess whether the new boundaries would create any transportation requirements.

Portland Public Schools
Enrollment Data Analysis: Framework for Decision-making
Proposal For Board and Community Consideration
February 11, 2005

Section 1: School Information

School: All Schools in Jefferson Cluster **Cluster: Jefferson**

Section 2: Nature of Proposal (Select appropriate boxes.)

- [x] Boundary Alignments
- [x] Program Initiation, Expansion or Closure
- [x] School Initiation or Closure
- [x] Restructuring the delivery of effective instruction, e.g. full-day kindergarten, alternative configurations, such as K-8, K-6, 7-12)

Section 3: Description of Proposal

Goal: High quality neighborhood schools and educational options

Core Components:

- **Creation of a state-of-the art high school (Jefferson) with an array of rigorous, theme and career-based small schools designed to prepare kids for post-secondary opportunities and serving grades 7-12.**
  - Closure of Whitaker and Tubman Middle Schools in 2006-07 with 7th and 8th graders incorporated into Jefferson or exercising existing options.
- **High quality, stable neighborhood schools:**
  - Merger of Applegate and Woodlawn to form a preK-6th grade school with enhanced curriculum and services.
  - Merger of Kenton with Chief Joseph to form a preK-6th grade school with enhanced curriculum and services.
- **Creation of high quality focus options:**
  - K-8 Arts Focus at Ockley Green
  - K-6 Spanish Immersion program at Beach

More specifically:

Jefferson campus

- For 2006-07, expansion of the current number of schools on the **Jefferson campus** from the current School of Pride and School of Champions to include a **Fine and Performing Arts School** (admission based on demonstrated talent), a **health/science careers pathway, early college options** and expanded partnerships with post-secondary institution such as the Portland Community College Cascade Campus and Lewis and Clark.
    - 2005-06: Relocation of Whitaker Middle School staff, leadership, and 7th and 8th grade students from the current Lakeside site to Jefferson. Co-located only during 2005. Treated as a separate school with separate entrance and security. In 2006-07 merger of 7th and 8th grade students into the grades 7-12 small schools of the Jefferson Campus.
    - 2006-07: Merger of the **Tubman Middle School** 7th and 8th grader student with the Jefferson Campus, closing the Tubman site.
    - Boise Eliot, Humboldt, King (Tubman feeders) move to K-6 in 2006-07 with curriculum and services redesigned to include the rigor and supports necessary for 6th graders. Thereafter, those schools feed to Jefferson (or in the case of some Boise Eliot students to Grant); students' transfer rights remain in effect.
    - Help implement vision by passage of general obligation bond that includes capital improvements in the Jefferson cluster (creating a state-of-the art high school campus at Jefferson and an arts pathway in the cluster).

Ockley Green K-8

- 2006-07: Development of **Ockley Green** into a K-8 performing arts, science/technology school as a district-wide focus option (no neighborhood attendance area). Ockley Green is currently planned as a district focus program that will draw students from throughout the Jefferson cluster and the district. Like the daVinci model, they will accept transfers from throughout the district to begin the K-5 portion of their program for the 2006-07 school year.

Beach PreK-6

- Expand the Spanish immersion program to K-6 in 2005-06; become full K-6 for 2006-07. Reevaluate in subsequent years whether to grow to K-8. End immersion program at Ockley Green. Will feed Jefferson either at 7th or 9th grades. Rigler shifts to feed Gregory Heights and Madison.

K-6 throughout the cluster by 2006-07 (Expand to PreK in subsequent years)

- Expansion of elementary schools feeding Jefferson to a preK-6 model, starting with schools feeding Whitaker (e.g. Faubion, Woodlawn, Vernon) for 2005-06 and extending to other feeders for 2006-07 (e.g. Chief Joseph, King, Humboldt, Beach, Boise Eliot). Work with all elementary schools in the cluster to enhance curriculum and support services for primary grades (preK-3) and the intermediate levels (grades 4-6) with specific attention to successfully maintaining the 6th grade.

Merger of two schools with adjacent schools:

- **Applegate** closes and students move to expanded school at Woodlawn.
- **Kenton** closes and students move to expanded school at Chief Joseph.

Section 4: Rationale based on data and research supporting change.

All of the elementary schools in the Jefferson cluster were reviewed. Five showed decline in enrollment meeting the criterion of 25 in one year and 75 in five years; eight indicated possible excess capacity; four had capture rates below 55%.

The two middle schools in the cluster (e.g. Ockley Green and Tubman) have declining enrollments. Together with Whitaker Middle School, currently in the Madison cluster, but included in this analysis, these three middle schools involved have the lowest overall enrollments among traditional middle schools in the district. (See attached School Profiles on the three middle schools)

The Jefferson High School campus has the lowest combined enrollment of any high school in the district.

Many of the schools receive staff currently funded by local option and/or desegregation funds. Both funding sources expire in June 2005. While no decisions have been made, staffing and programs will have to be redesigned to some extent. It is more effective to maintain a variety of courses and opportunities for students by combining reduced resources.

Opportunities for positive change:

- Core team of principals and teachers committed to working cooperatively for students
- $5.2 million, three year grant from the US Department of Education for magnet school assistance; grant is designed to "establish innovative new magnet programs" in the Jefferson cluster (discussions underway to realign grant to new school configuration)
- Strong community support for education
- Powerful ally in Portland Community College, located across the street from the Jefferson campus
- Potential to attract grants to develop Jefferson cluster
- Potential to enhance, upgrade facilities as part of a general obligation bond

Finally, there is compelling national research that demonstrates that reducing the number of transitions for students during the early adolescent years yields positive benefits in terms of higher retention, student self worth, and academic performance. Both the K-6/ 7-12 and the K-8/ 9-12 models reduce these transitions.

Research is very clear that knowing students and learners as individuals is key to making students successful. With longer spans of time with students, schools have a better chance of knowing students well and designing their supports as well as designing

options that fit students' interests and goals. Extended contact between students and adults is important in developing good relationships and has positive impact on student achievement (Anderson, 1985; Corcoran & Wilson, 1985). Multiple year interactions (such as K-6, K-8, 7-12 models) provide consistency for students and a feeling that someone knows them and their history (McLaughlin, 1994; McQuillan, 1997).

Specific data on schools recommended for closure/merger in 2005-06.

Applegate

- One of smallest overall enrollment (138), spread over 13 potential classrooms (density index of 11)
- Highest cost per student among elementary schools (in part because of losing 1/3 of its students since last year)
- 44% capture rate
- Accessible building in a residential zone; fair access to major highways and could house support functions for district.

See attached School Profile

Kenton

- One of smallest overall enrollment (166), spread over 23 potential classrooms (density index of 7, the lowest in the district)
- Eighth highest cost per student among elementary schools (in part because of losing over 25% of its students since last year)
- 53% capture rate
- Located on a major traffic/transit street adjacent to light rail station; high potential for redevelopment by district or others; not accessible to persons/students with disabilities

See attached school profile.

Tubman

- One of smallest overall enrollment (294)
- Second highest cost per student among middle schools (all funds)
- Second lowest among 197 middle schools on state math achievement; seventh lowest among middle schools in reading
- 48% capture rate

See attached school profile.

Whitaker (currently in Madison cluster)

- One of smallest overall enrollment (306)
- Highest cost per student among middle schools (all funds)
- 15th lowest among 197 middle schools on state math achievement; 26th lowest among middle schools in reading
- 36 capture rate
- Housed in temporary facility, on major highway; Board has directed the Superintendent to relocate the staff and students for the 2005-06 school year.
- Columbia site has potential for sale and other uses.

See attached school profile.

Section 5: Educational Impact

1. **How will the proposal impact student achievement?**

Student achievement should be positively impacted by the provision of:

- Greater choices for students through merging small schools that do not have adequate staff to offer full programs and choices at grade schools
- Greater instructional opportunities (e.g. rigorous curriculum, arts education; science, technology)
- Greater overall stability for the cluster by rightsizing the number of schools and providing a compelling vision to guide instruction
- Increased services to some of the most at risk children through high quality pre-school and full-day kindergarten programs
- PreK-6, K-8 and 7-12 education models that are proven delivery models – increased student achievement, attention, self-confidence, feels of safety/support, engagement

2. **How will the proposal meet the needs of low achieving, special needs, ELL, and TAG students?**

   These services can best be provided in educational settings large enough to provide increased opportunities. The funding of these programs follows the child and larger numbers will increase the time that service providers will be on site.

3. **Based on projected enrollment, how does the proposal meet the needs of the students in that school community?**

   In general these moves align with the schools' current school improvement plans and will provide greater certainty and stability for students and parents within the community.

Section 6: Cluster Analysis

1. **How will the proposed change affect equity of access to schools offering high quality educational choices?**

   The proposal includes schools or programs that will be offered as district-wide programs to attract students from throughout the district to popular educational options involving arts and health occupations. Access to these programs currently is limited by location and ease of access. As importantly, it includes strengthening the curriculum and program offerings and the stability of those offerings at neighborhood schools.

   The development of the art options will be facilitated by the federal grant. The goals as stated in the grant received by the Jefferson cluster are:
   (1) Reduce or prevent minority student isolation and foster interaction among students from diverse ethnic/cultural and socioeconomic backgrounds
   (2) Establish challenging and research-based new magnet school programs designed to expand educational choice for parents and students, advance the district's systemic curricular reform initiatives, and prepare all students to meet rigorous district and state academic content, performance, and career related learning standards
   (3) Demonstrate innovative and sustainable educational methods and practices that are effective in meeting diverse student interests, needs, talents, and future aspirations
   (4) Increase students academic achievement and preparation for a successful transition to post-secondary education and productive careers.

   Of the ten current elementary schools in the Jefferson cluster, six offer district funded (deseg) PreKindergarten – Beach, Boise Eliot, Humboldt, King, Vernon, Woodlawn. Four do not. Of those four, Applegate and Kenton are recommended for closure. If the district is able to maintain funding for PreK in 2005-06, adding these programs at Chief Joseph and Faubion will ensure access to services cluster-wide.

2. **How will the proposed change affect other schools within the cluster, both in the quality of their educational programs and in the number of students attending them including feeder patterns.**

   a. **Boundary changes**

      Proposal incorporates all schools within the cluster. **See attachment** showing current and projected enrollments for all schools involved. Also, **see map** indicating proposed boundary changes

b. Standard Support

As schools gain enrollment, they may become eligible for more standard support from the district. Under our current model, schools receive the following:

FTE Allocated by Schools ADM

ADM	0-249	250-299	300-399	400-499	500-599	600+
Elementary Support	3.5	4.0	5.25	5.75	7.25	8.5

This additional support gives more flexibility to larger schools to offer a more varied academic and support program. Depending on the pattern of enrollment shifts, receiving elementary schools may receive additional standard support, or at least avoid losing standard support through declining enrollment.

The same argument is true at Middle Schools:

ADM	0-250	250-299	300-399	400-499	500-599	600-699	700-799	800+
Middle Support	3.25	4.25	8.00	8.75	10	10.75	11.5	12.25

Note: Both Tubman and Whitaker are likely to drop from 8.0 to 4.25 standard support without some intervention.

3. How will the proposed change affect schools outside the cluster both in quality of their education programs and the number of students attending them?

Rigler students will feed Gregory Heights and Madison.

Because middle school students in the Whitaker attendance boundary currently attend a wide variety of middle schools, the long-term enrollment impact of shifting the Whitaker program to Jefferson is difficult to determine.

Section 7: Implementation Strategy

1. Action Steps/Timeline

DATE	EVENT
TBD	Community meeting
March 14	Board decision
April 8	New transfer deadline

2. What kind of assistance is needed? (e.g. facilities, nutrition services, transportation, staffing, materials/curriculum)

This Spring:

Assistant Superintendent:

- Proposed implementation support plan

Facilities:

- Projected boundary changes and enrollment impact
- Plan for incorporating 7-12 education at Jefferson (moving some current services out of building)
- Conditional use permit for Jefferson campus being open for 7th and 8th graders (issues of transportation impact and esp. parking; 3-4 months)
- Plans for expansion to sixth grade at Faubion, Vernon, Rigler, and Woodlawn

Transportation:

- Estimated impact on number of students needing bus transportation
- Redesign of routes

Human Resources:

- Developing staff transition plans for impacted staff in schools that will be closed.

Office of Teaching and Learning:

- Assistance with the development of a 7-8 curriculum at Jefferson that will transition students successfully to the School of Pride

Enrollment and transfer/ Communications:

- Grand-fathering of current co-op students
- Clarifying whether Jefferson is open for transfers from other middle schools for 2005-06

Portland Public Schools
Enrollment Data Analysis: Framework for Decision-making
Proposal For Board and Community Consideration
February 11, 2005

Section 1: School Information

School: Richmond Neighborhood Program **Cluster: Franklin**

Section 2: Nature of Proposal (Select appropriate boxes.)

- [x] Boundary Alignments
- [x] Program Initiation, Expansion or Closure
- [ ] School Initiation or Closure
- [ ] Restructuring the delivery of effective instruction, e.g. full-day kindergarten, alternative configurations, such as K-8, K-6, 7-12)

Section 3: Description of Proposal

Close the Richmond neighborhood program. Merge the current neighborhood program with Creston and Abernethy/Edwards. Redraw the attendance boundary so that students south of Hawthorne, east of 39th, and west of 50th attend Creston. Students living west of 39th in the current Richmond boundary will attend Abernethy.

Abernethy feeds Hosford/Cleveland and Creston feeds Kellogg/Franklin.

Continue the Japanese Magnet Program (JMP) as a district wide program. Explore the potential to expand the program with an additional K-5 cohort and/or by expanding the school to a K-8.

Section 4: Rationale based on data and research supporting change.

Background Information:

Richmond was reviewed based on density and capture rate. Their density index is at 14, a reflection of a relatively large building with 29 classrooms serving 393 students. At times, the building has housed K-12 programs. Richmond's neighborhood capture rate is

39% with substantial transfers both out (to other neighborhood schools and focus programs) and into the JMP program. In addition, they have experienced a decline in enrollment of 22 students over the past year and 84 students over the last five years (narrowly missing that criterion for review).

The Richmond building houses both a neighborhood school program as well as the K-5 strand of the Japanese Immersion program. The Japanese Immersion program, which began in 1989, feeds to Mt. Tabor Middle School and Grant High School. The immersion program draws students from both inside and outside of the district.

Richmond enrollment data:

SCHOOL	Number of PPS Students in the Attendance Area	Total Enrollment	Immersion Students	Neighborhood Students
Richmond	250	398	309	89

Neighborhood Program:

A neighborhood program of 89 students does not allow for adequate resources to provide the diversity of curricular offerings or student/teacher ratio available in other district elementary schools. Updated capture rate information indicates that there are 250 students within the Richmond catchment area: 92 attend Richmond, 45 go to Edwards; 24 to Atkinson; 15 to Buckman; 10 to Bridger; 9 to Glencoe; 8 to MLC; and the remaining 47 attend 20 other district schools.

Schools receive funding for staff and materials based on Average Daily Membership (ADM) for the past two semesters. Richmond has been forced to create blended classrooms due to low enrollment. (Based on 89 students, the neighborhood program at Richmond would only receive 3 teachers and 3 support FTE if it were a stand-alone school) It is challenging for small schools to provide staffing positions for counselors, PE, Music, and Art.

Japanese Immersion Program:

With 309 students, the Richmond Japanese Immersion Program would be viable as a district wide school in the Richmond building. Anecdotal data indicates that there is the potential to expand the program by adding a third class of Kindergarten. Additionally, there is currently an application pending for a Japanese Pre-Kindergarten program at Richmond.

Section 5: Educational Impact

1. **How will the proposal impact student achievement?**

Student achievement should increase because neighborhood students will be in educational settings with more variety in curriculum, staff and students. As outlined below, the larger size will specifically provide greater opportunities in each of the three receiving schools.

Student Achievement—% Meeting Standard on Oregon Statewide Assessment 2003-04

The percentages in this table are based on 2004-05 fourth and fifth grade Richmond students who took the reading or math assessments in 2003-04 (school where tested may have been Richmond or elsewhere). For grades 3-5 combined, 82% of Richmond students met the reading standard.

	Immersion	Neighborhood	All Students
Reading	93%	63%	84%
Math	91%	59%	81%

Note: Of Richmond students grades 3-5 in the 2003-04 school year, 82% met the reading standard and 81% met the math standard.

	Abernethy	Creston
Reading	93%	76%
Math	83%	64%

2. **How will the proposal meet the needs of low achieving, special needs, ELL, and TAG students?**

Currently five percent of Richmond students are receiving ELL services. By realigning the boundaries the percentage of ELL students will increase at neighboring schools and the amount of time an itinerant teacher spends at the school delivering services will increase proportionally. The same will be true for Special Education students (9%) and TAG students (10%)

3. **Based on projected enrollment, how does the proposal meet the needs of the students in that school community?**

Creston as a neighborhood school offers:

- Literacy instruction based on a three year professional development model lead by literacy consultant, Leanna Traill, in which each homeroom teacher is paired

with another certified teacher for a ninety-minute literacy block. During these blocks, grade level content is presented in thematic units based on state and district standards. Student to teacher ratio is reduced by half during literacy block so intensive instruction takes place at all levels and addresses the needs of individual learners.

- Free full day kindergarten to neighborhood students first, and then we will accept transfers from outside Creston boundaries. This program offers literacy and math instruction with two certified teachers working with students during two sixty-minute periods. Kindergarten students also receive PE and Music instruction twice weekly.

- A schoolwide Title I Program, which funds additional staff to support students with reading, writing and math. This program adds two to three teachers to our program each year.

- An inclusive Special Education model where students are placed in general education homerooms and served either in their homeroom setting when possible or in the Learning Center. All Special Ed services are provided by program specialists and paraprofessionals.

- Physical education and music classes taught twice weekly by program specialists.

- A new technology lab, housing twenty-four e-Macs that are used by students to complete research and learn how technology can be a tool for learning. Third, fourth and fifth graders receive weekly instruction in the lab.

- A long-range arts plan that offers yearly artist-in-residence experiences that include various mediums including creative drama, ceramics and visual arts such as painting and drawing.

- SMART (Start Making a Reader Today) tutoring to students in kindergarten through third grade to support the development and acquisition of reading skills.

- A variety of after school activities including Chess Club, Chorus and Mad Science classes.

- An active PTA that supports students and staff. Our PTA has successfully launched a Garden Club that is devoted to beautification of our grounds. Watch for hundreds of daffodils blooming soon!

- Before and after school childcare is provided by the YMCA in the school cafeteria, which is easily accessible for drop-off and pick-up from the back parking lot. Hours are: 6:30AM-8:35AM and 3:00PM-6:00PM. Parents are pleased with this program!

- An on-site Creston Dental Clinic that serves all PPS students who do not have dental insurance. The clinic is supported by the Assistance League of Portland. Creston students have the opportunity to receive additional services when there are cancellations or no-shows in the clinic.

Under a new proposal, Abernethy as a receiving school offers among other things:

a. A year-round school
b. A continuation of Read and Exercise Across America
c. PE and Music instruction
d. An Artist in Residence Program
e. Business and community partners – David Evans; Washington Mutual; Starbucks; New Seasons; Burgerville; Save our Elms; Friends of Ladd's Addition

Section 6: Cluster Analysis

1. **How will the proposed change affect equity of access to schools offering high quality educational choices?**

   The proposed changes would allow Richmond Neighborhood students access to larger neighborhood elementary schools with more curricular offerings and support. Additionally, by expanding the Japanese Immersion program, more district students would have access to this unique curriculum.

2. **How will the proposed change affect other schools within the cluster, both in the quality of their educational programs and in the number of students attending them including feeder patterns.**

   The proposed change will shift under 100 students to two adjacent elementary schools – Abernethy and Creston. . By realigning neighborhoods, each receiving elementary school would receive additional FTE and more standard support to enhance their educational offerings.

   By resolution, the Board gave Sunnyside neighborhood families high priority to transfer to the five contiguous elementary schools (Laurelhurst, Glencoe, Abernethy, Edwards and Richmond). By closing the neighborhood school at Richmond and Edwards and moving some of those students to Abernethy, there may be more limited spaces available for potential Sunnyside transfers.

3. **How will the proposed change affect schools outside the cluster both in quality of their education programs and the number of students attending them?**

   The proposed change will allow the expansion of one of the most popular and successful focus programs in the district.

Section 7: Implementation Strategy

1. **Action Steps/Timeline**

   a. Communication to families regarding placement/articulation patterns
   b. Staffing reassignments/scheduling/room assignments
   c. Professional Development for new staff/new program/new group of students
   d. Reallocation of ELL, Special Ed, TAG due to relocation of students
   e. Examination of current programs located at receiving schools
   f. Creation of new neighborhood PTAs, LSACs/afterschool programs/partners
   g. Welcoming activities for new neighborhood attendance area for beginning of school
   h. Redesign of new transportation routes/opening/ending times may have to change

2. **What kind of assistance is needed? (e.g. facilities, nutrition services, transportation, staffing, materials/curriculum)**

   The implementation support plan will outline any additional assistance/steps to be taken.

Portland Public Schools
Enrollment Data Analysis: Framework for Decision-making
Proposal For Board and Community Consideration
February 11, 2005

Section 1: School Information

School: Rieke/Hayhurst **Cluster: Wilson**

Section 2: Nature of Proposal (Select appropriate boxes.)

- [X] Boundary Alignments **(No action in 2005-06; reconsider in 2006-07)**
- [ ] Program Initiation, Expansion or Closure
- [ ] School Initiation or Closure
- [ ] Restructuring the delivery of effective instruction, e.g. full-day kindergarten, alternative configurations, such as K-8, K-6, 7-12)

Section 3: Description of Proposal

The Rieke/Hayhurst Boundary alignment has been the subject of discussion over an extended period of time, and continues to be a sensitive issue. After a careful study of the data and educational implications, it is recommended that the boundary stay as it is currently configured for the 2005-06 schools year.

However, it is also recommended that the boundary change be reconsidered in 2006-07 after the District has provided sufficient training and support for Rieke teachers in addressing the needs of students such as English Language Learners. The numbers of ELL students would increase significantly with a boundary change and Rieke's preparation, programs and support would need to increase commensurately.

Section 4: Rationale based on data and research supporting change.

The data and evidence does not indicate that a change in boundary at this time would result in improved education opportunities for students – there would be no specific benefit to either community.

The boundary change under consideration included the small area east of 30th. There are 35 students within that area. The students within this area have been assigned to

Hayhurst for more than 12 years. There are two housing centers within this boundary. One is Turning Point that houses families escaping violence and the other is the Hillsdale Terrace that is a federal housing project. Turning Point has high turnover and the Terrace has large numbers of ELL students. Hayhurst has developed a strong system of support and welcome for students from this area. Rieke has limited experience serving students with diverse needs such as ELL students and students from impoverished environments.

The following issues were considered and formed the basis for the current recommendation:

- The ELL services would be diluted for Hayhurst and both schools would have only itinerant services.
- Students currently ride a bus to Hayhurst and would need to continue to ride a bus due to the extreme safety issue faced in crossing from the Terrace to Rieke.
- Title I services would be diluted due to the small numbers in each school.
- There is strong family support with a full time Child Development Specialist (CDS) at Hayhurst and no CDS support at Rieke.
- Training to support students of poverty and students with language needs has been undertaken at Hayhurst for several years, and we will need to support professional development in these areas for teachers at Rieke if students are to make a smooth and successful transition.
- With the addition of Odyssey to Hayhurst, we now have a neighborhood program of 150. A reduction of 35 students could have a significant negative impact on programming as well as funding for the neighborhood school.
- Adding 35 students to Rieke would be difficult as they are nearly at capacity.

Section 5: Educational Impact

1. **How will the proposal impact student achievement?**

   Leaving the boundary as it is currently configured will have limited or no impact.

   Changing the boundary at this point would result in reduced services to ELL students and could impact special education students as well. The school performance in both buildings would be impacted by the loss of services at Hayhurst and the lag time created by the need for additional teacher training for the incoming students at Rieke.

2. **How will the proposal meet the needs of low achieving, special needs, ELL, and TAG students?**

   See above information for ELL and Special Education. TAG students will continue to receive services in both buildings.

3. **Based on projected enrollment, how does the proposal meet the needs of the students in that school community?**

   As stated above, there would be a negative impact on Hayhurst neighborhood population if the boundary were changed prematurely. There is already a transfer option open to the 35 students within the proposed boundary area. It would be important to advertise this option more broadly and continue dialogue with parents about their options.

Section 6: Cluster Analysis

1. **How will the proposed change affect equity of access to schools offering high quality educational choices?**

   Neither Hayhurst nor Rieke were identified as having, enrollment, density, or capture rate issues. Currently all of the children have high quality options in a school close to their home.

2. **How will the proposed change affect other schools within the cluster, both in the quality of their educational programs and in the number of students attending them including feeder patterns.**

   Maintaining the current boundary will have no impact on the rest of the cluster.

3. **How will the proposed change affect schools outside the cluster both in quality of their education programs and the number of students attending them?**

   This proposal will not impact students outside of the Cluster.

Section 7: Implementation Strategy

1) **Action Steps/Timeline**

- A strong communication plan will need to be developed immediately to assure the public that consideration of a boundary change was carefully pursued and a decision for maintaining the current boundary was proposed for strong educational reasons.
- Clear information shared to parents in this area about their transfer rights this Spring, prior to the end of the transfer cycle. Monitoring of transfer numbers from the area should be done during 05-06 school year.
- Reconsideration of making the boundary change 2006-07 with time for Hayhurst to adjust to reduced services and training for Rieke staff.

2. **What kind of assistance is needed? (e.g. facilities, nutrition services, transportation, staffing, materials/curriculum)**

- The Communication Department would be essential for establishing the message.
- The Enrollment and Transfer Office would need to monitor transfers.
- Focus groups would be helpful to inform parents of the possibility of transfer and the consideration of future change.
- If this issue is to be revisited we will need a plan of implementation that includes:
    - Communications
    - Specific Boundary students
    - Student identification
    - School and Family communication
    - Review of transfer information
    - Dialogue with the Cluster
    - Impact study for other schools

Portland Public Schools
Enrollment Data Analysis: Framework for Decision-making
Proposal For Board and Community Consideration
February 11, 2005

Section 1: School Information

Schools: Ash Street Boundary Alignment (Franklin/Grant Clusters)

Section 2: Nature of Proposal (Select appropriate boxes.)

- [x] Boundary Alignments
- [ ] Program Initiation, Expansion or Closure
- [ ] School Initiation or Closure
- [ ] Restructuring the delivery of effective instruction, e.g. full-day kindergarten, alternative configurations, such as K-8, K-6, 7-12)

Section 3: Description of Proposal

The Boundary for the Grant and Franklin clusters runs down the middle of Ash Street between 39th and 45th Streets. This boundary was established in 1981 when Washington-Monroe High School was closed. The proposal is to change the boundary so that the families who live on the South side of Ash Street are able to attend the same feeder pattern (Laurelhurst/Fernwood/Grant) as their neighbors across the street. There are currently 15 school-aged students that would be affected by this proposal.

Section 4: Rationale based on data and research supporting change.

Currently there are 15 school-aged children living along Ash Street between 39th and 45th Streets. Of those:

8 attend Laurelhurst
1 attends Fernwood
1 attends Grant
1 attends Mt. Tabor
2 attend Cleveland
1 attends Buckman
1 attends Benson

Eleven (11) students would be affected by this boundary change (those not already in high school). Of those, 9 would be guaranteed feeder rights if the boundary was changed. one is currently enrolled in the present cluster and would lose feeder pattern rights if the boundary was changed and the other 1 attends an elementary school outside of either cluster and may or may not take advantage of the feeder in either cluster.

Section 5: Educational Impact

1. **How will the proposal impact student achievement?**

   The 9 students already enrolled in the Grant cluster will have a guarantee to continue in their feeder pattern. Any new students would have a guarantee into the Grant Cluster. There is one currently enrolled in the Franklin Cluster that would have his/her feeder pattern changed at high school.

2. **How will the proposal meet the needs of low achieving, special needs, ELL, and TAG students?**

   Any low achieving, special needs, ELL or TAG students already enrolled in the Grant Cluster would be able to continue with their cohorts.

3. **Based on projected enrollment, how does the proposal meet the needs of the students in that school community?**

   It allows the 9 students currently enrolled in the Grant Cluster school community to continue in that cluster.

Section 6: Cluster Analysis

1. **How will the proposed change affect equity of access to schools offering high quality educational choices?**

   Laurelhurst, Fernwood and Grant would have fewer spaces available for transfer. These schools already have limited space. However, Glencoe, Mt. Tabor and Franklin, which are also high-density schools, will have a few additional spaces available.

2. **How will the proposed change affect other schools within the cluster, both in the quality of their educational programs and in the number of students attending them including feeder patterns.**

   See above.

3. **How will the proposed change affect schools outside the cluster both in quality of their education programs and the number of students attending them?**

   See above.

Section 7: Implementation Strategy

1. **Action Steps/Timeline**

   a. Communication to families and schools
   b. Work with transportation and IT to realign boundary in the PPS systems prior to transfer cycle

2. **What kind of assistance is needed? (e.g. facilities, nutrition services, transportation, staffing, materials/curriculum)**

   The implementation support plan will outline any additional assistance/steps to be taken.

Superintendent's Proposal for New Graduation Requirements

A Framework for High School Graduation Requirements

Portland Public Schools
February 14, 2005

"In times of change, learners inherit the earth, while the learned find themselves beautifully equipped to deal with a world that no longer exists."

-Eric Hoffer

The shift to knowledge jobs...

More than two-thirds of workers in growing, good paying jobs have postsecondary education.

- Office jobs: 30% of all jobs in 1959, 39% in 2001
  37% have some postsecondary in 1973, 69% in 2001
- Health care: 4% of all jobs in 1959, 7% in 2001
  50% have some postsecondary in 1973, 75% in 2001
- Technology: 2% of all jobs in 1959, 8% in 2001
  63% have some postsecondary in 1973, 86% in 2001

The shift to knowledge jobs...

"...good basic skills and, increasingly, post high school education and training will be minimum requirements for hiring. The primary labor market is virtually shutting down for those with limited skills and attainment."

Ford Foundation
Toward a More Perfect Union:
Basic Skills, Poor Families and Our Economic future

The shift to knowledge jobs...

Only one third of workers in declining or low paying occupations have postsecondary education.

- **Service jobs:** 20% of all jobs in 1959, 20% in 2001
  86% have high school or less in 1973, 60% in 2001
- **Factory jobs:** 32% of all jobs in 1959, 17% in 2001
  54% were high school dropouts in 1973, 21% in 2001
- **Natural Resources:** 5% of all jobs in 1959, 1.3% in 2001
  69% were high school dropouts in 1973, 42% in 2001

Learning and earning...

"A high school graduate in 1979, with no further education is making 23% less in 2001 than when they started."

- National Center on Educational Statistics

Learning and earning...

"Moving up the income ladder largely depends on increased education, job training,and opportunities to expand skill sets in the workplace."

- Carneval and Desrochers

Learning and earning...

Percent of Americans over 25 who hold degrees:

	High School	4 year College
1940	24.5%	4.6%
1975	65.3%	12.6%
1990	75.2%	20.3%
2000	84.1%	25.6%

- 2000 U.S. Census Report

Learning and earning...

Education levels of Oregonians over 25 in 2000:

Less than High School Graduate	13%
High School Graduate/GED	27%
Some College, no degree	27%
Associate Degree	7%
Bachelor's Degree	17%
Graduate Degree	9%

- 2000 U.S. Census Report

Growing the economy...

- In Oregon, 2002 – 2012 occupational employment projections call for a 13.6% growth with a total of 641,418 jobs (219,816 new openings).
- The fastest growing sectors in Oregon will be Health Care (24.4%), Service (15.7%), Non-classified (15.5%), Sales and related (15.1%), and Management, Business, Financial (15%).

- Oregon Employment Department

The demographic twist...

The Aging U.S. Workforce

	Under 34	35 and over
1980	51%	49%
1996	41%	59%
2006	37%	63%

- U.S. Bureau of Labor Statistics

The demographic twist...

"46 million 'baby boomers' with at least some college will be over 55 years of age by 2020. The combined effects of baby-boom retirements, flat educational attainment rates, and slow workforce growth should result in significant labor shortages, especially in jobs requiring the most skill and providing the greatest economic value."

- Carnevale and Desrochers

The demographic twist...

"Assuming moderate employment growth rates, these trends will result in a significant labor shortage of 21 million workers by 2020. Two-thirds of the deficit will be among workers with postsecondary training."

- Carnevale and Desrochers

Conclusion...

"Education is the best bet to help us maintain our competitive edge. Failure to serve the educationally disadvantaged is a lost opportunity in a time when more and more skilled workers are required."

- Carnevale and Desrochers

Conclusion...

"In the current economy, the only decision more expensive than going to college is not going to college."

- Carnevale and Desrochers

Analysis of Class of 2004 transcript...

Current Portland Public Schools Graduation Requirements define 14 credits as required and 8 as elective, for a total of 22 credits.

63% of the class of 2004 completed more than 24 credits.

Analysis of Class of 2004 transcript...

81% of seniors in the class of 2004 indicated they planned to attend college.

51% of class of 2004 seniors met Oregon University System Core Academic Course Admission Requirements.

Analysis of Class of 2004 transcript...

Current required credits in the core academic areas include 4 English, 3 Social Studies, 2 Math, and 2 Science credits for a total of eleven (11) credits.

69.4% of the class of 2004 completed three or more credits in Math.

56.5% of the class of 2004 completed three or more credits in science.

Recommendation...

We must increase the **rigor** of our academic expectations.

- Our students must have the academic foundation to be competitive in their pursuit of postsecondary learning and earning.
- Our schools have the capacity to sustain increased academic requirements for all students.
- Increased math and science credits will provide greater opportunities for students to achieve postsecondary success.

Analysis of Class of 2004 transcript...

Current Portland Public Schools Graduation Requirements define 8 credits as elective credits with no definition of elective.

30% of the class of 2004 completed four or more credits in an academic/career area of concentration.

"The key, and most important differentiator between successful and unsuccessful students was this:
The successful student shared a profound and positive vision of their own future."

- Joel Barker

Recommendation...

- To align elective credits that prepare all students for postsecondary learning and earning.
- To take advantage of current and projected employment and postsecondary opportunities for all students.

Strategy...

Portland Public Schools Graduation Requirements must meet the Oregon Graduation Requirements for the Certificate of Advanced Mastery (CAM).

- Develop an education plan and profile.
- Demonstrate extended application through a collection of evidence.
- Demonstrate career-related knowledge and skills.
- Participate in career-related learning experiences.

Strategy...

Portland Public Schools Graduation Requirements must include opportunities for students to demonstrate their preparation for postsecondary success.

- Proficiency credit options
- Student service learning
- Work based experience
- High school credit in middle school
- Early collegiate opportunities
- Diploma endorsements

Recommendation...

Next steps will be to provide the Board with increased High School Graduation Requirements on February 28, 2005 for the class of 2009 and beyond.

Feasibility Study on Disposition of Blanchard Education Service Center

FEASIBILITY STUDY FOR THE RELOCATION OF CENTRAL SUPPORT SERVICES
Final Report

EXECUTIVE SUMMARY

Shiels Obletz Johnsen led a Project Team that included GBD Architects and The Kalberer Company to conduct a Feasibility Study for the Relocation of the Central Support Services (Feasibility Study).

Assignment. The original purpose of the Feasibility Study was to examine if it is a feasible and financially sound option for the District to relocate the central support services located in the Blanchard Education Service Center (BESC). With agreement from the District, the initial scope of work was expanded to include looking at the possibility of redeveloping the existing BESC site with the principal administrative functions remaining at the location, but with the central kitchen and food services, the warehouse and distribution functions and maintenance services being relocated elsewhere.

Key Conclusions. The Project Team's key conclusions for the four key central service functions of the BESC – central administration, central kitchen and food services, warehouse and distribution services, and maintenance services are as follows:

- The BESC facility contains 365,435 gross square feet and encompasses more space than the District needs for its central services.
- The BESC layout does not lend itself to partitioning and subleasing beyond the current subleasing arrangements.
- The functions in the BESC do not need to be co-located to meet District needs.
- The District should not sell the BESC; it should engage the Portland Schools Real Estate Trust to develop a strategy for redevelopment of the site and relocation of some current central services.

Specific Findings. The following are our specific findings:

Central Administration:

- The District's central administrative services should be "unbundled" from the other central services currently located within the BESC.
- Decentralization of administrative functions and employees into other PPS-owned facilities is not financially feasible.
- The current BESC configuration is not particularly efficient for administrative office use.

Central Kitchen and Food Services:

- The central kitchen and food services functions do not need to be part of a central administrative services facility.
- Moving the existing full production kitchen and related functions, as they are currently configured, from the BESC to a new location is too expensive and cannot be funded by current foods services operations. We believe relocating to a reconfigured and downsized facility may be a viable option.

- Moving from one central kitchen to three regional kitchens using the existing format of full production facilities is even less cost effective than one central kitchen.
- While labor costs are consistent with private food service management companies' costs, the District's benefit costs are significantly greater.

Warehouse and Distribution Services:

- The warehouse and distribution services functions does not need to be part of a central administrative services facility; they should be co-located as part of a new central kitchen facility.
- The size of a centralized warehouse facility could be significantly reduced in size. A new facility utilizing high cube technology and other state of the art technological advances should greatly reduce the required square footage and improve warehousing efficiency.
- The District should pursue a new inventory management system and just-in-time supply contracts. Non-essential equipment and supplies could be stored off-site in a non-owned facility.

Maintenance Services:

- The maintenance services functions do not need to be part of a central administrative services facility.
- The District should pursue maintenance service partnerships with the City of Portland, Multnomah County and/or other public partners.

General Findings.

- At this time, the District cannot sell the BESC for enough money to fund the relocation of the current services to another site.
- The most cost effective short- to intermediate-term solution is for the District to remain in the BESC for the next two to four years while it pursues the recommendations set forth in this Feasibility Study.
