What has helped you/your student feel connected as they move from one school to the next?

(1/8)

- The teachers and the PTA.
- Strong sense of community and involvement
- The 2023/24 year we had no consistent Principal at Buckman. We were re-districted before our child started school. We were disappointed to be moved out of the Beverly Cleary catchment.
- Being able to visit school in advance and being able to walk or bike to school. Proximity makes it feel like it's our neighborhood and our community.
- Consistent staffing and administration, learning opportunities, having friends from the community
- N/A
- Getting to know other families and going to school social gatherings
- It is hard if no students from old school attend the new

(2/8)

school. Family event before school started in the fall was helpful

- Family club/PTA, school activities, volunteer opportunities
- Building community and be involved in PTA and moms groups to advocate for students needs. Continuity of teacher/admin
- Transportation that allows access to activities and community events
- Staff seeing him as an individual.
- The Creston principal has been really transparent about changes happening in the school and that has been immensely helpful and appreciated Activities for new families/students
- Moving with many other members
- of our program from our neighborhood and bussing. It didn't work well for us, and we
- had to lottery to a better school.

Experiencing change (2/3)

What has helped you/your student feel connected as they move from one school to the next?

(5/8)

- Community continuity
- Excellent parent groups
- Connection to school staff.
- Staff/Community
- Getting involved with the school and attending a school with our neighbors.
- We haven't experienced these changes but have had 2 permanent principals and 3 interim principals and a new permanent principal in the last 6 years.
- Consistent community, staying with friend cohort
- Arts, sports and activities that engage students and parents beyond academic capacity
- We have a strong sense of community as a neighborhood school, regularly seeing classmates outside of school.
- Transition planning
- Good transition programs to help him learn about the new middle school he was going to attend

- N/A

Experiencing change (3/3)

0 8 8

In the past five years, has your family experienced a school transition that you initiated? Why?

(1/9)

- We have transitioned from private child care to public care mostly for financial purposes, and we are so happy to have found our local community
- Yes. Better overall program and better extracurriculars. Standard grading system.
- Yes, we moved states. We specifically chose Buckman because of the arts focus
- We were looking specifically for a k-8 that had cluster classrooms. We feel strongly about that and it's not a common offering
- We had a terrible Grade 1 experience in 2024/25. PPS and the Buckman principal were not prepared to manage a teacher's medical leave. The students were not safe and not getting a strong education.
- We are very likely to transition schools off cycle (4th grade) because of safety (physical and emotional)

Experiencing change (3/3)

088

In the past five years, has your family experienced a school transition that you initiated? Why?

(2/9)

issues in a too-large classroom with extreme needs, and insufficient resources to manage these issues in the class.

- No, because we refuse to participate in the lottery system and believe it is a driver of inequities across the district. All students deserve quality neighborhood schools with great programming.
- Entering Kinder
- We moved from a small community to pps. We had hoped to keep our child in the same school for the duration of elementary
- preschool to kindergarten
- 2nd grade student at Irvington accepted to Access 3rd grade.
- No, we love Creston. The sense of community and affirming environment are vital.
- Leaving focus school for neighborhood school, leaving neighborhood school for

(3/9)

SPED focus room, then focus room closed, then move to middle school, and another move to Arleta for SES room because Marysville became “inclusion” model and lost SES rooms

- NA
- Our kids briefly left PPS schools during COVID because we felt the delay to in person was too long and online quality of education inadequate.
- We chose to send our Kindergartener to our neighborhood school.
- We transitioned to MLC instead of Tubman due to child's anxiety impacting school performance
- No. Our kids have experienced too many changes already initiated by the district.
- Our neighborhood school didn’t have the focus option that our child needed to succeed. My kid has Autism and relies on the arts program at Buckman.

Experiencing change (3/3)

0 8 8

In the past five years, has your family experienced a school transition that you initiated? Why?

(4/9)

- Yes. We needed alternative to traditional middle school.
- No
- Yes. My child was entering elementary school last year, and we sought out a PPS school with great STEM programming, school community, and fitness with family commuting and work logistics.
- We will be this year because of the arts being taken away at Buckman.
- N/a
- No-all PPS initiated.
- We are so excited to enter Rieke Elementary and become part of the community
- Too small of kindergarten cohort at neighborhood school that wouldn't have allowed for twins to be in separate rooms - had to transfer to next neighborhood school. Ended up with kids (3) at two different elementary schools due to this.

Experiencing change (3/3)

088

In the past five years, has your family experienced a school transition that you initiated? Why?

(5/9)

- No
- Pps teacher, not PPS parent
- Left Chavez due to past principal issues.
- We moved to PPS from an independent school to access a more inclusive environment and find more enrichment
- Yes. Trying to find a program that fit my children's special needs.
- No
- Yes
- Yes. Our child was in a private location and then required attendance in Trillium's Edwards school program. We transitioned from there to Lee at the start of the 25-26 school year.
- No
- No
- Yes, I developed cancer and being at an immersion school was too far from our community, so we switched

Rankings (3/3)

109

How important is it that students and families have access to a variety of learning environments close to where they live? (e.g. dual language immersion programs, neighborhood schools, focus programs or schools)

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(1/40)

- These type of changes are extremely disruptive and hard for our community. The switch from k-5 to k-8 to k-5 and a different middle school assignment then the previous k-5 was really bad for enrollment. Please take care to make changes that create stable and sustainable feeder patterns. Constant upheaval is bad for communities and for enrollment.
- We want to be able to invest in our local schools and keep families engaged. Kids and families staying together will make a huge difference.
- Chief Joseph is an amazingly supportive and welcoming school (evidenced in recent school surveys) and a leader in academic improvements. We need to listen to schools that are proving positive outcomes.
- That our community isn't well represented at

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(2/40)

meetings with the district, DLI programs are consistently represented by white parents and non-English speakers are rarely represented in these discussions.

- We have gone through a lot of changes in our community already (middle school boundary changes a handful of years ago and more recently high school boundary changes with dual enrollment ending) but also as a whole the potential constant threat of school change is so upending and mentally taxing.
- Lewis is a very special school community. We are strong and welcoming and high performing.
- Stability, and a warm welcoming community, and having options for different types of programming if the

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(3/40)

neighborhood school is not a fit is really important to our family, and within our school community.

- Neighborhood schools are so important for building community and promoting inclusive, equitable societies. My community is linguistically, economically, racially, ethnically, and socially diverse. These are aspects of the community that are important to my and my child's education.
- Creston's culture is involved and innovative. It would be devastating for if to be destroyed.
- Creston serves a vital role in the community. The CRIS program serves students from across the entire county. The fact that these students already travel from across the county means that it is

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(4/40)

vital we do not disrupt their routine and services. Additionally, the CRIS program is housing their pre-k program there next year and hopefully in the future, which would provide further stability for CRIS students across the educational experience. My student is not a CRiS student and has benefited immensely from learning alongside students of many different backgrounds. Additionally, Peaceful Villa housing is set to open in the winter, which is currently in the Creston catchment and will serve IRCO families, which would strengthen our community. We love Creston! The teachers and community are amazing.

- My school - Chief Joseph - is small. It is just a neighborhood school. I love it.

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(5/40)

It is a size where I feel like my kid is seen. The school feels great to be in. There is very little staff turnover. There is a real feeling of belonging of the students. I'm not sure making k-5 schools extra big would be better for the students or staff.

- The public school system can be a wonderful thing that gives opportunities to so many. My family has found an incredible group of families that are so close in age and proximity.
- Neighborhood schools are critical. When we look at the lottery/focus options, do they represent the demographics of the larger neighborhood or are they weakening neighborhood schools for folks who have access and privilege?
- Keeping neighborhoods students together at

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(6/40)

their closest schools will help to build community, and should help to sell the schools to new students/families. PPS needs to attract as many new families as possible.

- Equity is not a simple calculation as placed forward with the utilization model and comparison. You need to look at which communities are the most vulnerable first like title one schools, language barriers, ELD learners, SPED rates and income per capital before choosing to close with students in those more dense school and higher needs.
- Title 1 schools provide essential programs and support for students from lower socioeconomic backgrounds

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(7/40)

including preschool, after school programs, councilors and social services. They represent their diverse community in cultural events celebrating their holidays and history. If this is taken away, it will be another example of Portland separating and dispersing communities.

- Lent was just disrupted by the SEGC changes (which wealthier schools in SE were able to opt out of), and it feels so unfair to disrupt us again; we also only got our principle midway through last year, and need an opportunity to stabilize. Additionally, our school has been very affected by the attacks on migrants this year, and is a title 1 school,

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(8/40)

so represents a community with several intersecting points of disenfranchisement which need extra consideration. The community - both school and neighborhood - has rallied around vulnerable families to provide a Migra Watche at every drop off and pickup. Lent is truly a special, loving, and very well organized community.

- I hope that when schools are combined into a singular location, it will allow more opportunities fir students to participate in more variety of things - extracurriculars, clubs, AP courses. For schools that can't be combined neatly with a similar school (like alternative schools), i hope there will be a focus on building their enrollment rather than cutting the school.
- PPS focus program schools that are BOTH neighborhood schools AND magnet schools for others

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(9/40)

across the district help us to maintain strong, diverse, learning environments that meet a variety of needs. My neighborhood school is half lottery students, who benefit from our arts focus. This allows our school to stay open and allows ANYONE across the district to choose an
arts focus for their kids. The same is true for other neighborhood/lottery schools. (I know Buckman catchment families who lotteries for language immersion.) these schools enrich our whole system and make it less likely that those who can afford private school will divest from public education.

- Arleta lost many students of color in the SEGC process but there are still many families of color in our boundary: prioritizing families of color to be

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(10/40)

able to get to their neighborhood school is important in increasing enrollment and on time arrival, eliminating barriers and prioritizing equity for our most vulnerable families.

- We don’t want to leave pps but we and families like us and our taxes will leave if Salem doesn’t invest in helping to pay a groundwork to regrow Portland and PPS enrolpment
- Our school was part of the SEGC boundary change in 2022-23 and is on the list of lower utilization schools in consideration for closure (according to news media outlets). This is another potentially incredibly disruptive change for our learners, many of whom have already been impacted (and continue to be) by changes to their communities.
- the strong community ties that the school is the center ofh
- Look to past restructuring

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(11/40)

and learn from it. When you set goals for a process and don't apply them consistently it is not an equitable process.

- I think neighborhood schools are extremely important and don't want to see any closed - we've been at Marysville and Arleta and I love them both - but our neighborhood school, Abernethy, didn't work for my kids at all. Without focus options (DaVinci) and SES focus rooms, my kids would have had to leave PPS by now.
- Talk to each school community, in their own school building, to hear how it would affect families. Learn about all the resources that Title I schools are providing families. Go be a

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(12/40)

member of the school for a day and see what amazing things are happening in these small but mighty schools. Listen to the students, listen to the families, and listen to the staff. Walk the neighborhood and notice and wonder what these students' process will be for getting to their new schools, what will the transportation look like? Reach out and make contact,

even if it take a long time, to the most impacted families in the schools you are considering closing to hear their prospective. Keep class size into consideration, it DOES make a difference for learning.

- Capturing what makes the school strong and how that strength will be maintained prior to moving

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this? (13/40)

it elsewhere Programs need to be accessible within bussing boundaries to be sustainable and diverse

- School communities rely on the people in their community to take care of their kids.
- Understand what closing a school will do to the community (vacant building). Understand what losing an art focused school like Buckman will do for the rich education of our students.
- We are struggling under large class sizes but not large enough for another classroom. Title 1 schools like Grout should not be packed as much as other schools.
- People want to have high quality schools that are real options for their child - even if they're slightly farther away from one's home. Our experience with an under-enrolled K-8 showed us

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(14/40)

that trying to do too much with too little just ends up being unsatisfying for everyone. Make the tough decisions. It will be hard but the community will adjust.

- We are in the heart of our community and service as a neighborhood park.
- Community is built in neighborhoods, and allowing parents with resources to leave their neighborhoods to choose a focus school minimizes community, increases traffic and pollution, and is inequitable. Keep our neighborhood schools alive!
- It's hard to share constructive feedback without enough context here or sense of how this process is going to be done but I guess

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(15/40)

what's most important to me is that I want to see with any consolidations, those schools/regions with historical and current disparities in outcomes/resources get a significant increase in instructional and financial support so that smaller classrooms are supported, additional teachers aided to help a range of student needs, and efforts

to retain and support high quality teachers. This includes assuring schools also have adequate psychosocial supports in place to support families etc. (social workers/counselors etc.) I think because we have seen such devastating cuts that impact quality and programming that changed need to be framed and driven by the goal to achieve smaller classrooms of higher quality teaching/learning

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(16/40)

environments. We have soooo many issues across our schools and huge variability in instructions. We have schools where kids are watching movies 1/5 of their instructional days etc and others that high a higher expectation of rigor and all those issues in theory could improve with consolidation to the best strategies/resources if done well and equitable.

- Our community is strong. Our teachers choose to stay. A large percentage of the students walk and bike to school-often in organized community groups. We serve the community through our Cris Program, Head Start, and SUN program. I've heard that other schools are looking to Creston to try to follow their success with the 4/5 combined classes and our STEAM early release days.
- Lots of parents are unable

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(17/40)

to take time Out of busy schedules, to come to things like these meetings. That does not mean they care any less. Please do not let the loudest voices drown out true concerns.

- Look at class sizes with respect to outcomes. Don't close schools that are showing good results.
- Creston Elementary school is integral to our neighborhood and our community. Having a true neighborhood school made up of the children of the people who live on our street, and the next one over, and the one right after that, makes us stronger and more resilient when it comes to parenting and educating our children together.
- To consider the vitality of neighborhood schools, Title I schools in particular, as hubs for their

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(18/40)

community and not lose them in the shuffle of priorities among special programs or focus schools.

- Choice matters to families. Support your focus schools instead of strangling them to death. Let's be honest if you close focus schools people aren't going to their neighborhood schools, there are way better options in Portland.
- So many families from Jason lee walk their children to school and I'm worried about how that will be impacted if they have to go much farther to school.
- Our school is under enrolled on paper - 251 students K-5, or 60% capacity. However, there are students and factors that aren't reflected in that number. We house 50 preK students who aren't

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(19/40)

visible in that number and we house a Special Education focus program. This program serves students from across NE PDX. This is their school. That should be reflected somehow in the capacity percentage.

- Our utilization rate in PPS's formula is a little lower (55%), but every room in the school is used for critical purposes. It's hard to imagine packing the school tighter and what it would be if our school were packed into neighboring schools at higher utilization rates.
- You should know these decisions impact much more than the current financial health of the district, including the ability of our region to attract families, business, and capture revenue for other critical services. We need

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(20/40)

decisions to be anchored in a broad perspective of economic and livability trade offs, rather than place too much importance on utilization percentages - which don't have a consistent or direct correlation to learning outcomes.

- Our neighborhood school has a very strong feeling of community that allows for a great sense of stability within the school- for students, school staff, families and the neighborhood at large. We achieve great success with very limited resources and I think that leaders should look at what we are doing to achieve such a high level of success.
- They should understand that we have put a lot work into building a wonderful school community and to see the district casually destroy it while

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(21/40)

funnelling more and more funding into non academic pursuits is endlessly frustrating and will drive enrollment away from the public schools rather than towards it

- I think it's important to believe that if schools have to be consolidated, there should be a direct benefit to our students, such as more robust programming and resources.
- That we need to have more real opportunities to talk about our concerns regarding the potential changes in a way that actually helps us connect as fellow citizens and humans with children in these schools, not just have our data collected to align with the bullet points.
- They should know that the board has to inform the school if they plan on dismantling a focus program. That taking away most of a focus program

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(22/40)

at a certain school but saying it's still a focus school, is deceiving and know that you are going to lose so many kids from that school if you choose to do that. It's a sneaky way to quietly dismantle a program. Buckman is still a neighborhood school and closing it will be horrible for that community that had to deal with Washington HS and a vacant lot for years. It will bring crime and homeless and graffiti.

- Our community (Irvington) has been hit hard in the last decade with change. It is a dream of a school community and would hit the community hard if it closed. I suspect PPS would also lose many families to private schools if that happened.
- The community supports one another, and the school system should do the same.
- As I'm sure you already know, Irvington neighborhood is

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(23/40)

a strong supporter of its elementary school. We have an amazing, committed principal and highly engaged families. We would love for it to stay open.

- Make the priority the classroom and please explore all options to keep schools open.
- We are the only walkable neighborhood school in a sea of se Portland charter schools. It impacts our catchment. We need more schools who accept all students. We need to promote community and neighborhoods.
- Change is very hard for families - make one huge change now instead of a series of smaller changes or backtrack on changes. Don't give certain schools or communities special treatment - it needs to be looked at holistically. Be as transparent as possible.
- The level of diversity

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(24/40)

and needs in our community is great. Pre-k, CB, Behavioral, cultural, academic, economic, etc. The voices of those most affected by school closures are not here in this room today. They need to be reached in creative ways (direct phone calls, door-to-door, etc) to ensure they know about these possible changes and have their voices counted.

- School closure of a neighborhood school is like an asteroid slamming into one particular neighborhood which bears the brunt of significant costs to social cohesion, stability, community, and influences learning outcomes at all the adjacent schools as well. These are enormously consequential and it is impetitive that the district and it's consultants show their

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(25/40)

work. It is not for us to defend schools staying open; the burden of proof is in the district to demonstrate causal influence of school closure on district objectives, and that requires careful and transparent study if the cost reduction but also the extremely high costs.

- A group of working class parents trying hard to keep our community in tact for our kids

in our area. We don't have as much time to be as involved as some of the other areas and work to maintain our community school. We have 40% racial diversity and have a unique level of richness to our school. It is difficult to capture that in a poll.

- The socioeconomic realities for our population. The diversity. Honestly I wish they could come to

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(26/40)

our school and see what they're working with - not the numbers, the reality.

- Communities want to stay together. If 2 elementary schools can be combined, for example, vs. splitting a school group, it will help ease the transition.
- We absolutely love the Odyssey Program and hope PPS keeps it.
- That communities understand that the district mismanages the budget. That closing a school based on some arbitrary calculations is not the way to handle it.
- Please increase clarity about desired result. Amount of cost saving, % of building utilization etc. Otherwise, this will remain a show
- Pps verbally expresses their goal to prioritize under privileged students and families and families with

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(27/40)

different backgrounds and ethnicities. But they are hurting their lower income schools and students by allowing general populations of a boundary to lotto into other schools. This helps very few students but it hurts whole communicates in return. Prioritize title 1 schools.

- School choice is important to families - for neurotypical kids, for special needs kids, for artistic kids, for science kids, etc. If families don't get school choice at PPS, they will leave to place their kids at free Charter schools.
- As a diverse Title 1 school, many of our students already face challenges that would be exacerbated by closing the school. They stand to lose the most in a process like this and should not be

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(28/40)

asked to bear the brunt of the cost. We understand this is a process where there are no easy answers and we sincerely hope you will apply your own stated equity lens when making these decisions.

- There are so many students at Sunnyside (environmental focus option) who find the alternative programming essential to their growth and engagement at school.

This type of focus option programming I something that brings families from across the district and students who have tried other alternative schools. It is special that pps has free, public focus options. In the age of conformity in education, it is essential that PPS keep (and even expand) these types of alternative programming in order to attract students and to meet a large variety of student need.

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(29/40)

- We are paying attention to what you're saying and doing. You've said you plan to prioritize neighborhood schools and that is what we need expect to see.
- Disadvantaged kids need so much more than just school. Community services, food pantry, after school programs and pre-K programs.
- We chose to go to our neighborhood school because we care about our community.
- Most people around me feel that PPS and the State are inept and ineefectie.
- Equity includes going to places for the conversations with communities that can not get to you. All students deserve access to high quality education regardless of focus school or neighborhood income.
- The odyssey program fulfills a unique and important role in the larger pps community

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(30/40)

in terms of providing an alternative program that fits the needs of a subset of students who may not be served as well in our neighborhood schools. If we care about differentiation and diversity we should care about keeping odyssey.

- Distance =time. Time is a luxury not all of us have, and the further we're driving all day (if we're lucky enough to have a car), the more stress for the families
- People in our community support each other fiercely, as I'm sure they do in many school communities, and it would be painful to not only the children but the community at large to remove the heart.
- ACCESS is a unique school in a unique circumstance. We stand ready and willing to help facilitate this process and are willing to undergo change.

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(31/40)

Llewellyn is putting a great deal of outside resources into our outdoor space. We'd love for generations of kids to come to enjoy it.

- Chief Joseph is recognized as a leader in providing an educational environment where kids feel welcomed. Let’s make neighborhood schools across PPS all feel this way.
- That EVERYONE should be impacted, not just those with lower SES status or advocates who cannot attend a session. We want to see boundaries change for everyone at once instead of another failed piecemeal approach.
- Irvington community is very tight knit and works hard to encourage community and increase enrollment.
- Our school Chief Joseph elementary school is the true heart of

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(32/40)

our community. The school is performing well in academics but more importantly in developing kind, well rounded people who live amongst their classmates. This community needs our school to continue to thrive.

- It's frustrating to know that parents are able to lottery out of their neighborhood school and then see the data that those focus schools are highly utilized as compared to the neighborhood school
- You need to hear from more of our community! We are a school with 80% students of color. You need to GO to vulnerable communities to hear from them. A session with 80% white people is not representative.
- Please think about previous programming shifts or

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(33/40)

changes that have recently happened for schools. Another change could highly impact the community and students. Also please think about how this would impact students who are living with their own traumas and how change can affect the stability of their school.

- People not showing up loud at meeting d op Es not mean they are not just aspassionateabput their schools.
- Safe and close access to neighborhood schools
- Students in focus classrooms have already been separated from their neighborhood schools and communities, and school closures will be incredibly hard on them. I hope that this is an important consideration during this process, as they are already so impacted by long travel times and instability of their classroom locations.

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(34/40)

- Just as in healthcare, the money is not going to where it can make the most impact
- That we need varied sorts of programs to meet students' learning needs. A simple "cut out K-8s" or "cut out focus schools" seems like a decontexualized way to do this. There are reasons many families prefer these schools - neurodivergent kids, smaller school size, etc.
- The importance of schools as resource hubs for disadvantaged families, and the trust built in neighborhood schools amongst members of our communities that do not easily trust institutions
- ALL communities want their community to be left alone. But it is SO important that you look at all communities at once and

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(35/40)

not allow the loudest folks with the most access to opt out. Adjust all the boundaries at once if it's going to happen.

- Sunnyside is a great community that is supportive. Sunnyside faculty is amazing and they go above and beyond
- Strong communities and cultures around particular schools keep kids flowing into future grades.
- At chief Joseph we have worked to develop a strong community to support students as they work through elementary to support their progression to ockley and into high school. As we will be all now boundaried into Jefferson our students should be kept together to avoid excessive turnaround
- How this affects access to programs that are important, such as arts and special education
- People have a strong desire for small schools, small

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(36/40)

class sizes, K-8 programs and focus options. This seem to indicate that if these programs and impacted, families will likely choose to go private or homeschool.

- Options for educational diversity (e.g., DLI, Sunnyside environmental) that are responsive to student needs and family preferences are important for curbing attrition from district
- You don't live in our neighborhoods or represent us. You're making flippant decisions about title one schools. I'd like a response to the ww article that talked about closing low enrollment elementary schools, like the one my children attend.
- These decisions changes society and how they view the need to have children. Less schools and less funding means people are less motivated to have children.
- Affluent people will leave - how

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(37/40)

do we keep the most students?

- Looking at boundaries before closing schools, get educator and student feedback before making decisions
- Neighborhood schools sre taking a beating bc of all the focus options and are now being blamed for low enrollment even though kids live in their catchment but are goijg elsewhere.
- Jason Lee has a multicultural community, and the school really is an important part of the neighborhood as a whole.
- Neighborhood schools are the ONLY equitable way to move forward with this. I feel like the last question from the last poll forced an answer that school choice is more important than just going to a neighborhood school.
- They are close. They want for the kid next to

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(38/40)

them the same things they want for their kid.

- Schools being community together. There needs to be a very clear articulation if what we are trying to achieve and *how* we will tell if we achieved it.
- It brings people together to grow minds and relationships. Lack of resources affects this.
- Creston is a wonderful school. Our kid is so happy there and learning so much. The community - parents and children - are super engaged and that will not change when and if our school is expanded.
- My community wasn't invited to this conversation which was held 12-13 miles from our school with only limited and not very functional online engagement. Hold a session where our families live if you want to hear from them!

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this?

(39/40)

- I'd like to understand why we are here in the first place. If we could understand what the real issues are and what we're solving for, then we can help with more informed ideas/remedies. For instance, if our schools are under enrolled, what is the data about catchment areas? And how can PPS campaign for more student enrollment?
- We have been through many changes and are tired. We want our community to stay together. We understand this needs to happen.
- How important it is to be able to be involved in your local community. Creating relationships and enriching our lives together as a close knit neighborhood.
- We need as many schools as possible. Access to schools is vital for our community.
- I think school culture

Wrap Up! (1/2)

116

What should leaders understand about your community before making decisions like this? (40/40)

and connection to the community should be considered - very hard to quantify- but our school feels special, especially after experiencing other PPS schools.

- Title 1 schools should be protected and stay intact
- Whatever we do stay centered on students, equity and diversity in ways that serve our students
- Neighborhood schools matter to families and communities.

Wrap Up! (2/2)

117

What else should we think about during this process?

(1/33)

- Balancing all the factors to create a system that makes sense and efficiently uses limited operational dollars and facilities.
- What schools have been modernized?
- That there are kids struggling in every school and diversity of a school, and related equity considerations, should be understood as complex and not as simple as whether a school is T1 or not. There are more T1 qualifying students at some large schools than at T1 small schools - everything goes by a percentage so T1 status gives a warped sense of student needs.
- - Emphasizing improvement of neighborhood schools over focus schools to ensure access to strong education and community building for all students - Focus on

Wrap Up! (2/2)

117

What else should we think about during this process?

(2/33)

least disruption to students as possible (what other ways can we make cuts? i.e administrative costs, etc) - Ensure a thorough investigation int ALL costs to prove that any changes will actually result in a more
stable budget - Focus on fair opportunities for all students and families - How can we change the financing to prevent these shortfalls - Improve recruitment -- fully understand why are families choosing other options?

- The district made a lot of statements about the goals of SEGC - taking away unequal DLI/community strands and developing whole school DLI programs. The district needs to remember this

Wrap Up! (2/2)

117

What else should we think about during this process?

(3/33)

and look to make changes to align with those goals (ex single strand DLI at Atkinson could enroll at Lent and fix low enrollment and keep a full DLI program).

- Preserve k-8 and focus options. We need to preserve and maintain a range of educational options for families and students.
- How to recruit and enroll students. PPS to consider hiring a PR firm to repair reputation and increase enrollment. Examine if the programs put in place are actually helping us get out of the bottom of the USA in education.
- Can a whole school absorb another whole school to preserve community? For example- combine Rosa Parks and Peninsula. Go directly to neighborhood schools to talk to parents.
- Looking at what IS working,

Wrap Up! (2/2)

117

What else should we think about during this process?

(4/33)

and not getting rid of programs that are doing well just because they are programmatically different. What modeling will been done on how closures might impact further enrollment loss?

- Prioritizing equity, students of color and low income student needs. We need to mobilize and advocate for real school funding changes at the state level, not closing schools or reducing services

to families. We need the district to support this work - partnering with parents, students, teachers, and unions - to truly change the school funding model and sources in the state.

- Birth rate may go up after next presedential election and/or cost of living goes down.
- How will our most underrepresented students be impacted by these changes? Do we need as many admin

Wrap Up! (2/2)

What else should we think about during this process?

(5/33)

117

level positions at the district office when we are making so many cuts that will directly impact students?

- Close charter schools and prioritize neighborhood schools that are the only option for many families. These are a critical part of our communities.
- Is the same amount of money and attention being given to regular neighborhood schools as is being given to schools with special programs. The number of choices seem to be affecting neighborhood schools - and neighborhood classrooms in choice schools. Is there some way to look at those programs and evaluate those? Or a way to revoke charters of charter schools?
- All of the people that could not be here to make these comments,

Wrap Up! (2/2)

What else should we think about during this process?

(6/33)

117

whether it's because they do not speak english, because they did not have reliable transport, or because they had to work. Is redistricting a good use of admin time? How does this factor in compared to education support?

- How will the board stay together in your decisions so that you don't pit neighborhood schools that are the true strength of the system against each other?
- Relook at the expensive PPS leadership salaries who aren't impacting students directly before making decisions that's DIRECTLY affect our students.
- Consideration for moving immersion programs as needed to optimize school utilization. Schools with current immersion programs have artificially inflated student bodies, when that local school capture rate maybe isn't high. This

Wrap Up! (2/2)

What else should we think about during this process?

(7/33)

117

presents deceiving enrollment numbers as far as neighborhood schools go. Immersion programs can/should be moved as needed. Present utilization rates and local school capture rates side by side for transparency.

- Consider the economic barriers and access to schools that some neighborhoods and families have before looking at utilization. Consider the disparity of families who are not able to come and speak out, today there are very few families of color or second language families are not here.
- PPS border schools will see further attrition when families move away. Keep border schools and Title 1 schools in tact.
- We’re hoping that you’ll consider adding Atkinson's Spanish thread to us before either closing us or adding a neighborhood

Wrap Up! (2/2)

117

What else should we think about during this process?

(8/33)

thread to us. We really need an opportunity to stabilize after so many changes in the past several years.

- Equity lens us good. Please be careful that it doesn't end up playing demographics against each other. I thought the sign-in sheet that only asked name and race may have set many participants on edge. Not good to have folks feeling defensive the moment they enter the room.
- What are more pathways for people to provide feedback? Can slides (or a recorded presentation) be made available online, with the SLido questions set up as a poll to collect feedback from people who can’t attend sessions? This would make the responses compilable/comparable with session responses to get a wider dataset on these questions .
- Making sure students can get to their

Wrap Up! (2/2)

117

What else should we think about during this process?

(9/33)

school without having to cross dangerous streets.

- Do not harm neighborhood schools that are successful! Take responsibility for recruitment and truly listen to the people.
- We love Portland and our teachers and are sad that we can't find the money to help give our kids a normal education
- What about right sizing the administrative budget so the heaviest burden doesn't fall on front line school communities? And if there is a right sizing taking place, please share transparently with the PPS community. If 78% of the community respondents are White, how will this critical feedback opportunity reach the historically marginalized community members who can't attend?
- historical changes to enrollment from changes

Wrap Up! (2/2)

117

What else should we think about during this process?

(10/33)

from k8 to k5 community engagement through SUN and PTA equity lens. Concern that reductionist scores fail to mitigate systemic racism in history of district and broader lens is required than what was presented today

- Coming to our schools and listening. Particularly the school and programs that just went through something like TWO YEARS AGO! Effective communication to all groups within the community/district. For those not represented at these meetings, find a trusted partner to represent their needs and listen! Blasting families with messages on parent square is not enough.
- When kids are moved to schools farther from home and

Wrap Up! (2/2)

117

What else should we think about during this process?

(11/33)

take the bus, they lose access to after school opportunities.

- Go to each school for a listening session. Make it more of your priority to hear from families who were not represented in the room today.
- How do we help one another protect our children from viewing this as such a loss they don't want to go to school? Amazing school communities are not in the buildings they are in the people... Many people in the room are very hurt by this, angry even.... How might what is reopened provide more of what families want....
- Allowing for school of choice enrollment for schools under 75% utilization-- if you want to go to that school, you can. Example- legacy Black families

Wrap Up! (2/2)

117

What else should we think about during this process?

(12/33)

priced out of Woodlawn would drive their kids to Woodlawn so they can go to a school with other Black students. Get ride of non-neighborhood lotteries for already high utilization elementary and middle
(Sunnyside). Look at how the PPS charter schools are affecting neighborhood school enrollment. Survey people to find out why they are not enrolling in neighborhood schools and see if we can address those reasons

- Please allow for actual discussion with the parents. Listen to our teachers. Stop cutting our art programs and our school days.
- I believe technology and digital learning harm kids. If making classes available online or using digital learning is part of the

Wrap Up! (2/2)

117

What else should we think about during this process?

(13/33)

discussion i believe it will drive more parents away. Move away from all costs investing in technology in the classroom.

- Prioritizing low SES schools and seeking to shield communities that literally have been huddling in their homes for the past 14 months from further destabilizing transitions makes sense. Those communities should receive consideration when making decisions.
- Why can’t PPS having a marketing plan for each school? Parents want to understand what their community schools service are.
- 1. The impact closing schools will have on families with resources, they will choose to go to private schools or homeschool, further deepening this exact issue. It will

Wrap Up! (2/2)

117

What else should we think about during this process?

(14/33)

not be resolved. We will have a steamrolled enrollment crisis because of these failures 2. Creston was able to almost double their kinder enrollment with some simple outreach. Before making these drastic changes that will deeply wound communities, they need to focus on outreach and improve our catchment. Catchment increase should

happen before anything else. If we don't fix why people are leaving Pps, people will keep leaving Pps and this issue won't be systemic and right sizing won't fix anything

- Class size is a HUGE issue at many schools and complete unrealistic for teachers to teach under these circumstances so any consolidation should be sure to address these issues. Thanks for all your work on this.

Wrap Up! (2/2)

117

What else should we think about during this process?

(15/33)

- One of the concerns that drives people away from PPS schools, and into private schools is the fact that PPS students get such little actual instructional time to their peers nationwide. Bringing PPS to 180’ day school year, might help up enrollment.
- OSBA needs to figure out how to unlock the education stability fund. Parents should consider suing the state to use stability funds. They also need to consider campaigns for alternative state revenue streams dedicated directly to education, like a low sales tax, etc. Oregon needs to get its head out of its with respect to funding education.
- Focus schools should be considered for consolidation with the same scrutiny as a schools that don’t offer a focus program.
- Low income and people

Wrap Up! (2/2)

What else should we think about during this process?

(16/33)

117

of color may not show up as much to these sessions, and it would be worth considering going to those schools themselves to learn their needs.

- Have an honest listening session instead of whatever this was.
- I'm worried about our more vulnerable students in this type of change. How will it impact attendance rates, performance rates, and ultimately the motivation of parents to keep their kids in the PPS district.
- If we had a truly just and valued public education system in our state / country, class sizes would be 15 kids.
- You should be thinking of what is your plan with assets closed to instruction, and how those buildings will continue to impact the

Wrap Up! (2/2)

117

What else should we think about during this process?

(17/33)

communities they sit within. How will PPS avoid contributing to the doom loop of vacancy that is staving off investment in our city?

- I think you should think about what a fully resourced school would look like. Don’t just take things away without a plan to replace them or improve them.
- Should be thinking about how to save schools rather than destroying them and how to avoid insulting the community with misleading slogans like "right sizing". Maybe try actually listening to the community rather than have us talk to each other. We're not here to rubber-stamp your decisions we're here to tell you that you're making a mistake.
- Please don’t keep cutting programs and days. Our students deserve to have

Wrap Up! (2/2)

117

What else should we think about during this process?

(18/33)

access to education that enlightens, supports, and lifts them up. This doesn't happen when they don't have access to the arts or music. It's even less likely to happen if they can't go to school.

- That we want to be connected to our community, and I worry that if parents don't feel heard by PPS they will be more likely to move their child to a private or charter school or move out of the district entirely if their school is negatively effected or closed down.
- Why focus schools were actually brought about. To make it equitable for people from around the city to be able to go to a focus school. There used to be busses to take these kids to the focus schools. THAT'S what makes it not equitable.

Wrap Up! (2/2)

117

What else should we think about during this process?

(19/33)

- Please look at school cultures. If there is a happy, stable thriving community at a school please prioritize that over a school with high administrative turnover or an unhealthy social culture even if they have a higher enrollment.
- Take care of every child. Likely the people that need more help and care have a harder time voicing their needs. Don't forget them.
- People need LOTS of data, and a transparent decision making process. Esp data about demographics and why school enrollment in PPS is down. Is it because #of students in Portland is down, or because families are choosing other options for schooling?
- The kids our communities and the families.
- Prioritize neighborhood schools How about bringing a language course

Wrap Up! (2/2)

117

What else should we think about during this process?

(20/33)

to the curriculum at all schools? Reduce the number of immersion schools. Prioritize reading supporting k-5, our outcomes are dismal! Work with Portland city government to increase business friendliness to increase enrollment. We have trouble recruiting at hospital because people don't want to send their kids to Oregon schools which rank so low.

- Neighborhood schools should be prioritized over focus or alternative options. K-5 vs K-8 needs to be addressed - we need to get all of the schools on the same program.
- Again, the most critical voices that aren't in the room and how to reach them in other ways.
- The process presupposes school closure is the right option. That needs to be demonstrated, not assumed.
- Most of the current

Wrap Up! (2/2)

117

What else should we think about during this process?

(21/33)

decision makers in PPS are relatively new and don't have the historic perspective to know that PPS has tried this many times and has failed over and over. That's why we are in the situation today. This process has be done well and it has to be decisive. Many people in this community have lost faith in this district.

- Are there other ways to navigate funding cuts without closing school on the administrative level? Are there community partnerships to maintain this schools and offer the space in a collaborative way?
- The barriers to being heard during this process. We have a hard time getting our school community to PTA meetings because people work multiple jobs, have limited resources we try to overcome but

Wrap Up! (2/2)

117

What else should we think about during this process?

(22/33)

struggle to - make sure somebody checks in with them. We're trying, the PTA, the school via ParentSquare - try not to miss big swaths of people that would be intensely impacted.

- Disruption is a contributing factor to declining enrollment... families give up and send their kids to private schools because they know what to expect. Whatever happens with right-sizing needs to be stable and sustainable for the next 10-15 years... we can't be doing this again 3 years from now.
- In my view, communities seem easiest to grow and strengthen when they are small. Kids do better, parents do better. I like to openness to get our opinion, but it feels like decisions have

Wrap Up! (2/2)

117

What else should we think about during this process?

(23/33)

already been made, which is disappointing. I'm open to this move, but there needs to be more effort given to what positives it brings, because so far it's all about to minimize the impact.

- Hold more community sessions. Also, survey families who have left PPS or who never enrolled and ask them why.
- Prioritize focus option schools to allow families to have some small choice in their children's education. This will help prevent the worsening downward spiral of enrollment. These families might be more likely to pull their children from PPS altogether if the focus options are removed.
- Do you remember when PPS paid for a study on projected enrollment back in 2007? Several schools were closed and oops, the study was wrong.
- What was the plan

for utilization or "rightsizing" when the K-8 were split to k-5? It seems like the neighborhood schools are paying for lack of vision

- Showing true visual sand data about title 1 schools. How their enrollment would change with lotto schools closing. How much enrollment would increase with families at their neighborhood school.
- Preservation of our historic school buildings over our schools that have kids in mobile classrooms. Once are historic schools are gone, they can’t come back and we lose our cities history.
- I think it would be useful to see which schools alumni feel connected to have have fond memories of
- The future of our city and how people will view

our district when choosing where to live and send their kid to school. Closing more schools won't attract new enrollments and neighborhoods with vacant school buildings won't attract new residents.

- Do this right. We don't want to visit this situation again for a long time. Looks at housing development trends. We had a large apartment complex built in our neighborhood and this spiked enrollment.
- Transparency and a clear plan of action would be appreciated so that parents can make an informed decision regarding their kids education.
- Student teacher ratios How would you feel if your kid's school got closed? What consultants can you cut instead?

What else should we think about during this process?

(26/33)

- People around me are tired of cuts after cuts.
- Awareness of current events at each school such as administrative instability (principals changing annually) or politically driven retaliation against immigrants. Cesar Chavez K-8 has been through a lot of trauma.
- The families who unfortunately would leave pps if there schools close, which would further our problem.
- Closing schools impacts neighborhoods, businesses and people beyond the school community for many years.
- Think about bringing together areas or groups of schools to help brainstorm solutions for their geographies and help you.
- Close all of the charter and focus schools, but support them

in this transition. Let’s put resources into our neighborhood schools!

- Redrawing boundaries before closing schools. Its important for folks to see what the impact would be if we even out wnrollement and how that affects programs available at each school. Some will gain, some will lose. If the cost does not create great public schools, ONLY then should we consider closing schools. Pps rarely does multiple initiatives at the same time WELL. I don't want to see another set of deeply impactful decision made without deep engagement and purpose.
- Transparency. Clear and logical decision making. Share your math.
- School academics, proximity to green space,

diversity, low turnover rates for teachers

- This approach feels reactive to short-term pressures. We're consistently talking about cuts, but less about the underlying reasons enrollment is declining. If we want to reverse that trend, we should be thinking about how to strengthen and invest in our schools so they're compelling choices for families, not actions like this that will accelerate the shift away from them.
- Figure out how to grow enrollment
- Equity, equity, equity! I really believe every child deserves amazing schools. And, for too long, we have failed our students of color.

117

What else should we think about during this process?

(29/33)

- Please think about the staff in the buildings. Having to furlough this year and the impacts of all the budget cuts lead to stress for educators. All of that on top of their school potentially closing could be devastating.
- Please don't be swayed by loud affluent communities in this process!!! Choice options lead to inequitable schools, and poach resources from neighborhood schools. Resources that are hoarded by those that already have more resources.
- Why do we have K-8 and middle schools?
- Limiting impact on students and communities that will feel it the most - that lack resources such as transportation

(30/33)

and basic needs services that make moving to a school outside their neighborhood not an inconvenience but a disaster

- Be transparent. Folks will be upset, but don't be secretive. Give background and reasons in an easy to understand way.
- How to get money / founding from other sources that don't not include closing schools or canceling school days
- Is there a chance to take performance into account, or a strong effort to improve performance? While birth rates are down, known middling performance drives families away from schools. Until the schools perform better, the declining enrollment trend is unlikely to improve.
- Road safety for biking tos hook and walking
- Minimizing impact to families and staff at these schools

117

What else should we think about during this process?

(31/33)

- What does the data show in terms of how kids learn best. What programs are currently doing that well - offering those kids of programs. Cluster classrooms, small classes, etc.
- Capacity is not square feet. Equity isn't a math equation. Neighborhood schools should be the priority.
- Releasing any educational funding and saving schools now before its too late . Opening schools to include preschool .
- Maintenance and facilities!
- Portlanders say they love community. So focus on neighborhood schools and making them thrive
- Show us the data on how much PPS will save on this effort and how you plan to reinvest it to actually make the schools better. Thank you.
- Teachers and students

(32/33)

need all we can give them in any way possible. That's the priority over all. Everything else comes after.

- How sensitive are these decisions to changes? How confident are we that these decision will remain the right one, even as forecasts shift.
- Equality for all students.
- You gotta deal with the charter school issue. They are sucking away public resources in multiple ways.
- Prioritize the basics - neighborhood schools for all kids - rather than nice to have extras like focus schools.
- Please consider those who are attending online. We need the ability to view all materials easily.
- We need to take the state of our buildings into account. There are many buildings that need a lot of maintenance

to keep up, and if we need to close schools, it makes financial sense to close schools that are falling apart.

- Making consistency around K-5/6-8 or K-8s. There shouldn't be both.
- Try to focus more on recruitment and innovative ideas to gain students rather than consolidation
- Please consider the seismic safety and overall state of facilities in addition to enrollment. Please also consider the impacts to the overall city - schools are hubs of community and children make a neighborhood richer.
- Don't close our schools!
- Marketing campaigns to increase PPS enrollment vs. closing schools
- Shortest Distance/walkabilty for familes to get to school
- What if this was your kid?
