Subject: SB 3 Curriculum for New High School Graduation Courses

---

Summary
The SB 3 (Senate Bill 3) workgroup began meeting monthly in October 2025 to review new course standards and evaluate and develop curriculum for the two new high school graduation requirements: .5 credit Higher Education and Career Path Skills and .5 credit Personal Financial Education.

The workgroup included counselors, administrators, central office staff, and teachers (instructional specialists, AVID, Advanced Math, CTE Business, Science, Social Studies, Special Education). Based upon the recommended criteria for the review and selection of instructional materials for Higher Education and Career Path Skills and Personal Financial Education, the workgroup agreed upon a customized curriculum for the Higher Ed & Career Success (HECS) course and adopted Next Gen Personal Finance for the Personal Finance course. Initial professional development will be offered to teachers on Wednesday, May 14, 2025.

Higher Education and Career Path Skills: Higher Ed & Career Success
Oregon's High School Higher Education and Career Path Skills standards include four domains:

1. Seeking Assistance and Self-Advocacy
2. Career Exploration and Preparation
3. Postsecondary Readiness
4. Workforce Readiness

Each of these domains includes three to four standards which encompass the knowledge and skills that students should know and be able to do to be prepared for postsecondary opportunities based on their own goals and aspirations for their future. The standards also include Key Concepts that are relevant to each domain and standard.

To fully address all of the standards and key concepts, the HECS curriculum team included lessons from the College and Career Exploration course for 9th grade students, the Career College Collaborative (C3), AVID, MaiaLearning, Get Schooled, and the two adopted Transformative Social Emotional Learning (TSEL) curriculum: Wayfinder and We Do It 4 the Culture.

Assessments in the course include self-reflections and evidence, a resume, and My Plan Project. Both the Resume and My Plan Project fulfill the Oregon diploma Personalized Learning Requirements.

Personal Financial Education: Personal Finance

Oregon's High School Personal Financial Education standards include five domains:

1. Credit and Debt
2. Banking, Investing, Saving and Repayment
3. Budgeting, Spending and Money Management
4. Personal Income, Taxes and Services
5. Maintaining Financial Well-being.

Each of these domains includes three to four standards which encompass the knowledge and skills that students should know and be able to do to be financially literate when they leave high school. The standards also include Key Concepts that are relevant to each domain and standard.

Teachers on the Personal Finance curriculum team adopted the Next Gen Personal Finance curriculum, a free curriculum that is highly recommended by current CTE teachers and utilized by many school districts. The team co-developed project-based assessments for students at the end of each unit. These assessments focus on demonstrating knowledge acquired throughout the unit and ensuring that students are completing a project that will have an immediate impact on their personal lives. Teachers will be given the flexibility to adjust these projects based on the needs of their students, and the workgroup led with voice and choice in mind in the development of multiple assessments for each unit.

Higher Ed & Career Success Curriculum Team Members:

Kathleen Reid	Benson	AVID Coordinator
Morgan McFadden	Benson	Counselor
Danielle Cota	Cleveland	Vice Principal
Desi Wolff-Myren	Franklin	AVID Coordinator
Yoshio Drescher	Franklin	Instructional Specialist/Coach
